VOLUME 5. MARYVILLE, MISSOURI, FRIDAY, MAY 7, 1915. NO. 290.

PAVE MULBERRY, AND THOMPSON?

REMONSTRANCES ON THOSE TWO STREETS NOT ENOUGH, BELIEF.

FIFTH AND NINTH PAVING ASSURED

Council Passes Improvement Ordinances Tonight After Inspecting Opposing Petitions.

It now seems certain that at least ten blocks of paving will be added to the credit of Maryville this spring as a result of eight resolutions to pave thirty-nine blocks adopted recently by the council. The time for filing remonstrances ended last night. The city council will meet tonight to examine the various remonstrances and decide what pavement to order. Remonstrances were circulated and filed on all but one of the twelve streets on which paving was proposed. It now seems certain, however, that one on which a "kick" was filed will be paved just the same, while two more are in question. Although an effort was made to oppose the paving on Fifth street from Market street, west six blocks to Dunn street, no remonstrance was filed.

A remonstrance was filed against paving Ninth street from Mulberry to the east line of the Normal grounds, but there were not enough names to down the proposition, so that, too, will be paved.

Thompson May Be Paved.

A petition signed by twenty-nine persons also was filed, remonstrating against the paving of Thompson street from Walnut street east four blocks to Main street. It appears now that many do not belong on the petition, some not owning property along the blocks proposed for paving.

An investigation made by Harry Snyder, abstracter, this morning, brought out the fact that of the twenty-one eligible property owners along that street eleven had signed against the paving, which would give them one majority, unless some other finding is made before the council meets tonight.

May Pave Mulberry, Too.

Mulberry street, from Ninth to Twelfth streets, also may be paved, despite the fact that a remonstrance signed by ten was filed. The abstracts along this street also are being examined with the belief that some signers do not belong on the petition.

It appears that all others are killed, however, unless it is on West Third street, where the change of one or two names would throw it into the list of those streets to be improved. It is said that one owner has expressed a willingness to favor the paving, even though she opposed formerly.

Each of the resolutions provided that the paving be a bituminous product, while the ordinances to pave Fifth and Ninth street will probably provide for asphaltic concrete, one form of bituminous paving. No brick is provided by the resolutions.

Must Advertise for Bids.

The paving ordinances made out today by City Attorney W. H. Crawford for each street proposed for paving, provide that where ordinances to pave are passed the city engineer shall advertise for bids for paving at least one week, and to express at that time the date the bids are to be in.

The ordinances provide that the contractor shall do all work and furnish all material. It is planned by City Engineer F. L. Flynt to rush the preliminary work along, so that actually paving might begin as soon as possible.

BUYS FANCY BEEVES.

Forsyth Packing Company Invest in Car Load of Local Cattle.

The Forsyth Packing company purchased this week of Hal T. Catterson a car load of fancy cattle to be killed and dressed for their retail trade.

All of the beeves are young corn-fed Shorthorn stock, raised on Mr. Catterson's farm, north of the city. The cattle will be fed and held at the Forsyth plant, northeast of the city.

W. C. Risser of Burlington Junction was in Maryville last night.

BURNED BY GASOLINE STOVE

Mrs. August Stapler Has Second Mishap in 3 Months—Home Damaged by Fire.

For the second time within three months Mrs. August Stapler, 309 West Fifth street, was burned about the limbs and body at 9 o'clock this morning, when a gasoline stove exploded.

Immediately Mrs. Stapler threw the stove into the yard, but not before being burned. The burning stove also ignited the floor and roof of the porch. The flames spread to the house siding, doing about $75 total damage.

The fire department responded, but neighbors had succeeded in quenching the flames within a short time.

BALCONY FALLS, 2 INJURED

Burlington Junction Youths Listening to Booster Band, Take Tumble—One Dislocates Shoulder.

Frank McGrath, 14 years old, had his left shoulder dislocated, and Margaret Caldwell, 10 years old, suffered a spinal injury, perhaps seriously, when the balcony of the old city hall at Burlington Junction collapsed yesterday afternoon. The youngsters had climbed on the old building in order to better see and hear the concert given by the St. Joseph band, which accompanied the St. Joseph Commerce club on its trade excursion yesterday.

The old balcony, weakened anyway, was insufficient to withstand the weight of the several youths, and fell to the ground, a distance of about ten feet.

BUSINESS FUTURE BRIGHT.

Wabash Hauls Many Loaded Cars Now —May Improve Roadbed.

That the future looks bright to the Wabash Railroad company is evidenced by the activities being taken by the officials in the way of proposed improvements along this line of the company. It is said between twenty and forty loaded freight cars go east daily now, compared to about two-thirds that number during the winter.

Local Organizer Clark was over the line a few days ago inspecting telegraphic equipment and taking an inventory of stock. It is presumed that an increase to the telegraphers' pay is contemplated.

There also is rumor that the Wabash will reorganize soon with $120,000,000 less capital, the same to be used in roadbed, rolling stock and station improvements over the entire system.

RALPH FARMER WINS HONORS.

Makes Record in Two-Mile Run at Oberlin Athletic Meet.

Ralph Farmer, the son of Mr. and Mrs. S. E. Farmer of 722 South Main, who is a student at Oberlin college, Oberlin, O., won one of the high honors in athletics at the triangular meet between Oberlin, Wooster college and Reserve Polytechnic schools, held at Oberlin, taking first place in the two-mile run. Young Farmer has taken second place twice before in this same event, winning in the inter-class and inter-college track meets.

Mr. Farmer has also been elected editor-in-chief of the Oberlin Review, the official college newspaper. The young man is now in his third year at Oberlin, and has been making a number of good records for himself during this time.

RURAL CHURCHES HOLD SERVICE

Mt. Zion and Swan Chapel Will Observe Mother's Day.

The Mt. Zion and Swan Chapel Methodist churches, in the Graham district, will observe Mother's day Sunday with a special service and an appropriate sermon by the pastor, the Rev. G. C. Wadding.

The service at Mt. Zion will be held at 11 o'clock a. m. and the one at Swan Chapel at 3 o'clock in the afternoon. Arrangements have been made for the Graham orchestra to attend both these services, it is expected that every auto or carriage owner plan to bring some one, particularly the old people, to the services.

TO FILL CITY JOBS

COUNCIL TO MAKE NINE APPOINTMENTS TONIGHT.

TO CREATE NEW OFFICE

William Mozingo to Be Street Cleaner —Plan Sidewalks in South End— To Change Cemetery.

A busy session of the city council is expected tonight as the result of the paving ordinances to be considered, the appointment of nine city officials, the creation of a new city position and the transaction of other special and the routine business. The paving propositions will require most of the time of the officials, it is expected

With that out of the way, will come the appointment of the various appointive officials virtually decided on at a special session of the council Wednesday night, as exclusively reported in The Democrat-Forum yesterday.

An ordinance bill to create the office of street cleaner also will be presented. William Mozingo was decided on for that position. The bill as prepared by City Attorney W. H. Crawford, provides that this official's duties shall be "to clean the streets of the city of Maryville, to remove all earth or offal, and do such other work as the street committee of the council may direct him to do."

Change in Another Office?

Mr. Mozingo will be expected to furnish a team, wagon and harness, and shall work ten hours per day at such periods as are designated by the street committee. He will receive $75 a month.

There is a hint that with the creation of the office of street cleaner there may be a change as to city engineer. There is talk among some of the councilmen of either abolishing the office part of the time each year or reducing the salary. An effort was made last fall to abolish the office through the winter, but it failed.

The offices of city engineer and street commissioner were merged last spring and F. L. Flynt appointed to hold both as city engineer. He receives $100 a month.

To Build South End Walks.

An ordinance bill also has been drawn up providing for the building and construction of sidewalks on the east side of Market street between Grant and Leiber street, a distance of four blocks, in the south extreme of the city, and also on the north side of Leiber street, between Market street and the city limits.

A petition signed by more than ten residents of that part of the city has been filed with the city council. The walks are to be four feet wide. All property owners are to construct the walks within thirty days after the passage of the bill.

Another ordinance bill for the exchange of a tract of land at Oak Hill cemetery, as considered last month, has been prepared for consideration tonight. The city proposes to trade a certain portion of the tract to Dennis Morrissey for some land owned by him there.

TO ATTEND RAILROAD MEETING.

W. E. Goforth Will Address Conference of Burlington Representatives.

W. E. Goforth, agent of the Burlington, will leave tomorrow for Creston, Ia., where he will attend a meeting of railroad representatives, to be held at 2:30 o'clock Sunday afternoon.

Mr. Goforth will make an address on the subject "Improved Methods for Safe Transportation of Merchandise."

The meeting is a "get together" council to discuss matters for the mutual interest of the company and employes. Mr. Goforth will return to Maryville Monday morning.

Arrive from Kansas City.

Mr. and Mrs. Joe Brown and children, Fredda Josephine and Joe, Jr., arrived in Maryville last night to visit Mrs. Brown's parents, Mr. and Mrs. Fred Hastings.

MRS. ELEANOR REDMOND DEAD.

Body of Former Resident Brought to Maryville for Burial.

The body of Mrs. Eleanor Redmond, a former resident of this city who died yesterday at the home of a daughter in Marysville, Kan., will be brought to this city for burial, arriving over the Burlington at noon tomorrow.

The body will be taken from the station directly to St. Patrick's church, where funeral services will be conducted by the Rev. Father Henry F. Niemann. The body will be buried in St. Patrick's cemetery beside that of her husband, John Redmond, Sr., who died a number of years ago.

Mr. and Mrs. Redmond were among the pioneer people of the county and well known among the older residents. When they came to Nodaway county they settled on a farm northwest of the city, and after her husband's death Mrs. Redmond lived on the farm until about twelve years ago when she went to Kansas to make her home.

LUSITANIA IS SUNK

LARGEST PASSENGER STEAMER, 1,310 ABOARD, TORPEDOED.

WARNED OF SHIP'S FATE

Many Abandoned Voyage at New York When Mysterious Prediction is Made of Disaster.

By American Press.

LONDON, MAY 7 (3:45 P. M.)—THE LUSITANIA SANK AT 2:33 O'CLOCK THIS AFTERNOON. PASSENGERS ON BOARD BELIEVED TO BE SAFE.

LONDON, MAY 7 (2:45 P. M.(—THE CUNARD LINER LUSITANIA, CONSIDERED THE LARGEST PASSENGER SHIP AFLOAT, WAS SUNK OFF OLD HEAD, KINSALE, BY A TORPEDO TODAY. ASSISTANCE HAS BEEN SENT. IT HAD 1,310 PASSENGERS ABOARD.

The Lusitania, which was sunk off Old Head, Kinsale, Ireland, today, sailed from New York, May 1, on its voyage to Liverpool, which is had nearly reached when torpedoed. Before t sailed from New York more than one hundred anonymous messages were circulated among the passengers warning them that the ship would be sunk before it reached Liverpool. It is an English vessel.

As a result of the prediction many of the passengers abandoned the trip, while 1,310 remained on board. It carried the largest list of second cabin passengers since being built. Among those on board were Alfred G. Vanderbilt, Charles Frohman, Charles Klein, dramatist, and Mr. and Mrs. Elbert Hubbard.

The Lusitania had a speed of twenty-five and one-half knots per hour and was provided with unusual water tight bulkheads. The boilers were placed in the middle of the ship, insuring greater safety. The coal bunkers were thirty feet under water, also rendering fire less likely.

When a near-panic ensued among the passengers after the receipt of the mysterious warnings, a Cunard line official laughed and said. "The Lusitania can show its heels to any submarine."

The German embassy at Washington May 1 also issued an official notice warning Americans to remain off all ships flying the flags of Germany's enemies. Old Head juts out from Kinsol harbor, on the south coast of Ireland.

Mrs. M. Carter returned to her home at Burlington Junction today, after a visit in Maryville with her mother, Mrs. S. J. Wills.

TO SPREAD GOSPEL

BAPTIST MEN'S CLUB START EVANGELISTIC TEAM MOVEMENT.

WILL TOUR DISTRICT

Members Pledge $75 for City Base Ball —Will Assist in Mother's Day Service.

The appointment of a committee composed of Prof. W. M. Westbrook, D. E. MacDonald and Ray Davis to organize five gospel teams was one of the most important transactions at the monthly conference and banquet of the Men's club of the First Baptist church held last night at the church.

The plan as proposed at a previous meeting is to have the gospel teams do evangelistic work throughout the counties of Nodaway, Holt and Atchison. The Nodaway county team will co-operate with the teams selected from the other counties in holding a revival service at each of the thirty-one Baptist churches in the district. Services will also be held in the school houses, and there will be open air meetings.

This campaign will culminate in a general rally to be held at the Baptist church in this city.

The other committees appointed to assist in this work include Captain Charles Hyslop, William Everhart and Eugene Ogden, to chose the place of service, and Ed Brewer, G. B. Holmes, Sr., and J. A. Spires, advertising committee.

About fifty members were present at the meeting last night. The club agreed to sell $75 worth of tickets for the base ball games during the summer and nearly half of the amount were sold last night among the members present.

Arrangements were also made for the club's part in the special Mother's day service to be held Sunday, and a committee was appointed to see that autos and carriages were furnished for all who were unable to walk to the church. This transportation committee is composed of Dr. Karl Malotte, William Everhart and Miss Ada Albert.

A report was also made by the committee engaged in raising a fund of $2,500 for repairing and remodeling the church. Their work has progressed rapidly and has been given a hearty response.

ALLIES USE FIRE SHELLS

Inflammatory Missiles Burn Turk Town—Ship to Shore Fight Continues in Dardanelles.

By American Press.

Dardanelles, May 7.—The artillery exchange between the warships of the allies and the shore positions of the Turks continues. Some vessels are firing from Saros, making use of inflammatory shells. The town of Miados was set on fire yesterday by this means.

WOULD RESTRAIN CHICKENS

Prepare Ordinance to Preserve Gardens and Lawns—Provides Fine For Violation.

An ordinance to prohibit chickens and domestic geese from running at large in the city of Maryville has been prepared by City Attorney Crawford for presentation to the city council tonight. The ordinance was proposed to Attorney Crawford by Councilman Edward Dragoo. The city already has an ordinance prohibiting geese from running at large, but no other domestic fowls. Recently—in fact, each spring—many kicks are registered by residents against the intrusion of neighbors' chickens in gardens and yards.

As a result the following ordinance bill is provided:

"It shall hereafter be unlawful for the owner or person in charge of any chickens or domestic geese to suffer or permit or cause the same to run at large outside of the inclosure of such owner or person in charge of such chickens or domestic geese within the limits of the city of Maryville, Missouri, and any such owner or person in charge of any such chickens or domestic geese who shall permit, suffer, or cause the same to run at large within the limits of said city contrary to the provisions of this ordinance shall be deemed guilty of a misdemeanor and shall be punished by a fine of not less than one ($1.00) dollar nor more than ten ($10.00) dollars for each and every offense."

It does not mention ducks, turkeys nor guineas, however.

MISSOURI SOUVENIR SPOONS

On sale Friday and Saturday at Alderman-Yehle's, 10c each. Start your collection now.

AUSTRIA IN BIG ADVANCE

Russians Lose Ground and Men in Danger of Annihilation—Teutons Capture Tarnow.

Special to the Democrat-Forum

London, May 7.—That the Austrian forces are slowly forcing the Russian lines back and that part of the Slavish armies are in danger of being annihilated seems eminent from dispatches received here from the front. According to a dispatch from Vienna the Austrian southern wing has crossed the Wisloka river and that the Russians are retreating east of the Lupkow pass.

The Austrians also have occupied the heights east of the Dunajec and the Biala rivers and have captured Tarnow, west of Premsyl.

IN TWO CONTESTS TODAY

Four High School Athletes in Trenton and Four in Tarkio Literary and Athletic Events.

Eight boys of the Maryville high school are competing this afternoon in two athletic events of northwest Missouri. Four are contesting in the inter-high school track meet at Trenton and four at Tarkio tri-state events. They also will try for honors in the Tarkio literary contests tonight.

The Trenton contestants are Ellison Frank, George Flemming, Eugene Yehle and Claude Glass. They left yesterday for Trenton, accompanied by E. R. Utter, principal of the high school.

Those trying for honors at Tarkio are Verne Pickens, athletic; Don Roberts and Phillip Colbert, athletic and literary; Miss Georgia Evans, declamation Several other high school students accompanied them there today.

HUGHES BONDS BRING 5 1-2

Local Firm Makes Best of 3 Bids—Gives $251.60 Premium—Are Dated July 1.

The $30,000 bond issue voted March 30 by the voters of Hughes township for bridge improvement in that district was sold by the county court this morning to the Gillam-Jackson Loan and Title company of Maryville, at 5½ per cent interest and $251.60 premium, bonds to be dated July 1, 1915. There were two other bidders, one of which made three bids.

J. H. Sutherlin & Co., Kansas City, made the single mail bid of 6 per cent interest and $377 premium, bonds to be dated July 1.

The William M. Compton company, St. Louis, personally represented by Royal D. Kercheval, made three offers. One provided for 5½ per cent interest, $52 premium and bond date of July 1. Another offered 5½ per cent interest, $115 premium, bonds to be dated June 1. The third offer was 6 per cent interest, $610 premium and bond date of July 1, 1915.

After considerable discussion and mathematical work, the court decided the local bid was best. The sale of the bonds was in charge of George Pat Wright, local attorney.

The bid is considered a good one. The $25,000 road bonds voted last fall by Lincoln township was bought by a Chicago firm through Gillam-Jackson for 5½ per cent interest and only $60 premium.

The Hughes bond interest is to be pain semi-annually. The bonds are to be paid in not more than fifteen installments, the first to be July, 1916, and the last in 1930. They may pay all within five years.

CHINA TO ACCEPT JAPAN'S DEMANDS?

INDICATIONS ARE ORIENTAL WAR WILL BE AVERTED.

JAPS CONTINUE WITH PREPARATION THOUGH

Nippon Army in Manchuria Ready for Emergency—Forces Clash at Tsinan—U. S. to Remain Neutral.

By American Press.

Peking, China, May 7.—The latest indications are that China will accept all the demands made by Japan.

London, May 7.—The Japanese government has sent an ultimatum to China allowing the Chinese government forty-eight hours to accede to Japan's demands. The ultimatum implied that Japan would use force if China's reply was unsatisfactory.

Tokio, May 7.—The army corps stationed at Hiroschima and Okayama already have prepared for eventualities. Hanchuria dispatches say the Japanese are leaving China hurriedly and that Japanese and Chinese troops have clashed at Tsinan.

Washington, D. C., May 7.—In a statement issued last night Secretary Bryan clearly states that the United States will stand absolutely neutral in regard to the Japan-China trouble.

The demands which China has so far granted Japan are: China to grant Japanese the right to work mines in south Manchuria and eastern Mongolia; that all disputes between the Japanese in Manchuria of whatever nature shall be under Japanese jurisdiction; that schools and hospitals may lease land from the Chinese, thereby reserving land ownership; to grant a concession to Japan to build the Nan Chang-Chao-Chow-Fy railway if Great Britain consents to the release of China from the negotiations begun concerning this railroad two years ago.

LOOK OUT FOR FROST.

Government Weather Bureau Warns Against Freezing Tonight—Went to 40.

"Light frost tonight"—Government weather bureau, Chicago.

That is the notice received by J. R. Brink, local recorder, this afternoon. The reading this morning showed a minimum temperature of 40 degrees, but no persons have reported having seen any frost last night or this morning. Nearly the same temperature will prevail again tonight, it is believed.

As it is in the "dark of the moon" it is believed frost is likely tonight. If light, however, there is little danger of vegetables being killed, it is said.

To Give Concert Tonight.

The weekly concert of the Maryville Commercial band postponed last night on account of the weather will be held on the court house lawn tonight instead. The same program as was announced for last night will be given.

Miss Elizabeth Ashford left yesterday for Kansas City to spend a few days buying new summer stock for the Ashford Millinery company.

THE WEATHER

Fair tonight and Saturday; light frost tonight.

Attention Everybody

Saturday, May 8, is Magazine Day. Place your old magazines on the front porch.

There seems to be an era of lynchings on the high seas in which neutral ships and innocent victims are sent to the bottom of the seas for no other reason than that they are away from home.

Before our adorable women take charge of the government we would like to know if they intend to make the men adopt their plan of buying more clothes and wearing less of them.

If insurance rates continue to be raised every time the legislature meets, may it not be necessary to dispense with the legislature altogether?

It looks like the farmers of the west might harvest two crops of wheat this year. We mean two crops measured in dollars. The government crop reports show that there will be an increased acreage and the prospects are excellent for a fine crop. Most of the wheat last year was sold before the high price mark was reached, and the buyers reaped the big profits, but this year, whether the war closes or continues, it looks like high prices will continue at selling time, and that the wheat raiser will get almost double the usual price for his crop. This means a flood of gold into the great west and middle west.

FLIES AND MEASLES.

The health commissioner of Chicago warns the people of that city especially against flies and measles during the present summer. Pointing out the well known habits of the fly in carrying germs and spreading disease of every kind, he urges an organized fight against them. Food should be screened, garbage should be kept closed and stables should be cleaned of fly breeding accumulations. They should not be allowed to reach sleeping babies, and, while they yet few in number, they should be swatted persistently and vigorously.

As to measles, it is one of the most treacherous and contagious diseases known. More catching than scarlet fever or smallpox, it should be avoided. In addition to the large death list to its credit, it does no end of damage to eyes, ear drums and internal organs. Its ravages can be greatly reduced by promptly separating the children when they show the first symptoms and the lives of many little ones may thus be saved.

Letter to Mr. R. S. Braniger.
Maryville, Mo.

Dear Sir: Lead-and-oil is not good paint; don't wear; the rule is, as everyone knows, repaint in three years.

Devoe lasts six, in the same way—allow wide margin in all such statements. What does it mean, to last? It means the same with both.

As to covering: that's another. Here's an instance.

Mr. J. J. Hall, Sheffield, Pa., painted two houses, lead-and-oil; took 40 gallons.

Last summer bought 40 gallons Devoe for the same two houses; returned 10 gallons.

The paint, that covers, lasts; it's all paint, true paint, and full measure. Lead-and-oil is all paint but not good paint; the lead wants zinc. Better paint Devoe. Yours truly,

F. W. DEVOE & CO.,
New York and Chicago.

P. S.—Koch's Pharmacy sells our paint.

FRECKLES

Don't Hide Them With a Veil; Remove Them With the Othine Prescription.

This prescription for the removal of freckles was written by a prominent physician and is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold by druggists under guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely.

Be sure to ask the druggist for the double strength othine; it is this that is sold on the money-back guarantee.

To Fight Hog Cholera.

Campaigns against conditions which result in hog cholera and other live stock diseases are being launched in different parts of Buchanan county by Leon V. Crandall, county farm agent, and J. C. Rand, representative of the agricultural college of the University of Missouri. It is planned to have the movement county-wide within a short time. Two clubs have been organized so far.

REVIVAL TO END SUNDAY

Evangelist Thurston Price to Give Special Sermon for "Mother's Day."

The revival service at the First Methodist church which has been going on for the past three weeks, will be brought to a close with the Sunday night service.

Definite announcement of this was made last night by Evangelist Thurston Price, who has been conducting the meeting.

In keeping with the sentiment of Mother's day, Sunday, the Rev. Mr. Price will take for his sermon subject "Home Life."

Tomorrow night one of the greatest services of the week is planned, and the evangelist at this time will preach on the subject "The Mastery of Environment, or How to Stay Religious When the Big Meeting is Over—How to Face the Racket."

Preceding the regular preaching service at 8 o'clock tonight there will be a half hour prayer meeting for everyone held in the basement of the church, beginning at 7:30 o'clock. The subject of Mr. Price's sermon will be, "Sirs, What Must I Do to Be Saved?"

The meetings have been attended with unusual success and the workers expect the number of conversions to be greatly increased by Sunday night.

Crowd Present Last Night.

In spite of the inclement weather of last night the church was filled with interested people. The Rev. Mr. Price spoke from the subject "What Shall the Twentieth Century Man Do With Christ?" saying in part:

"In the words of my text, Pilate asked 'What shall I do then with Jesus, who is called Christ?' And they answered, 'Crucify him! Crucify him!' Pilate took a bowl or a pitcher of water and stood before the people and said: 'I wash my hands of this innocent man's blood.' If Pilate only had realized it that stain wasn't on his hands, that stain was on his heart.

"But the great question for you, and the great question for me is not so much what Pilate, the Roman governor, did away back there two thousand years ago, the great question for us to face is what shall I do with that Christ, or what am I doing with Christ?

"The hour is rapidly approaching—in fact, it is coming in great leaps and bounds, when the tenor of the preaching of every recognized church in America is going to be one thing, and that is, in the human heart there is a throne. Salvation is absolutely tied up in one thing, and that is getting Jesus Christ on that throne. Everything depends upon it.

Three Great Tests.

"There are three great supreme tests that any man that has made a great claim to anything has no right to object if you put him to those three tests. Let us subject Jesus Christ to those three tests.

"First of all, when a man makes any kind of a claim, you have a right to go back to the people that knew him the best. What did that man's message mean to the people of his own day, and how did the thinking, intelligent people take it? Never man spake like that man, that is what his enemy said.

"You have a right to put his claim to the text, what did the people of his day, what did the enemy think of the works that he did?

"His enemy said. 'We know that thou art a teacher come from God. Why do we know that thou art a teacher come from God? Because we have sense enough to know that no man can do these works unless he come from God.'

The Final Judgment.

"Jesus Christ left behind him about one hundred and twenty out-and-out followers, and about three hundred and eighty nominal followers. Jesus Christ has been gone for about two thousand years, and Jesus Christ has about six hundred million followers. Bob Ingersoll left the world about twenty years ago and left about 5,000 well organized Ingersoll clubs, and he has a solitary organization left today."

Mr. Price said if George Washington would come back to earth the people would give him the military salute; if William Shakespeare would return to earth the people will shake his hand, but if Jesus Christ would return to earth the people would kneel to him. He quoted Charles Lamb in this connection, and said "If Jesus Christ should walk in we would all kneel down. The brains of America will salute a Washington, shake hands with a Shakespeare, and go down on their knees to the Christ. What are you doing with that Christ tonight."

Strawberry Shortcake.

Mix and sift two cupfuls of flour, four teaspoonfuls of baking powder, two teaspoonfuls of sugar and one-half teaspoonful of salt; then sift a second time. Work in one-fourth cupful of butter, using tips of fingers, and add gradually three-fourths cupful of milk. Toss on a slightly floured board and divide into two equal parts. Pat and roll and fit into two buttered round layer cake pans, shaping with back of hand to fit pans. Bake in a hot oven twelve minutes. Pick over, wash and hull strawberries, allowing one quart of berries to each shortcake. Cut berries in halves, reserving some of the choicest for garnishing, put in an earthen bowl, sprinkle with sugar, crush slightly and let stand on back of range until warmed. Split hot shortcakes and spread cut side with butter. Put one of the pieces crust side down on hot serving dish, cover with prepared berries, then with a piece of shortcake crust side down. Cover this with prepared berries, then spread top with whipped cream sweetened and flavored with vanilla. Garnish the top with reserved whole berries.

ALFALFA FOR EVERY FARMER.

No Farm Should Be Without Lucerne Patch, Kansas Farmer Says.

Every farmer having a piece of land which will grow it should have that land seeded to alfalfa. We are coming more and more to a realization of the benefits of some alfalfa hay in the ration. This is true not only in the case of dairy cows, but in the case of all other farm animals.

There is only one reason why the hay of alfalfa is superior to the hay of millet or prairie grass. This is because it contains more protein—more muscle building, bone building and milk making feed. If there were a better name for this constituent of alfalfa we would use it.

Plain people are prejudiced against the term "protein" because it is so generally used in the books, but there is no getting away from it. Because this constituent exists in alfalfa in excess of our common feeds is the reason alfalfa hay is so valuable.

It is not necessary that alfalfa hay be grown in quantities necessary to supply all the hay needed for the animal. All we need is enough to balance the ration of corn, kafir or cane silage or the dry roughage of these crops.

If silage is used as the principal roughage, the amount of alfalfa necessary to feed is decreased. There are thousands of farms in Kansas which could grow the alfalfa necessary to properly balance other feeds in the ration. On these alfalfa ought to be grown, even though it is necessary to seed the entire acreage of good land. Yet the sorghum crops will grow on the poor land.—Kansas Farmer.

TO 'SWAT ROOSTER' EARLIER

State Campaign Against Fertile Eggs to Begin May 15, This Year.

The "swat-the-Rooster" campaign has been staged for the middle of May this year, which is three weeks earlier than last year. As eggs will show fertility enough to spoil in hot weather for at least two weeks after the male bird has been removed from the females, the delayed severing of marital relations in the poultry flock last year resulted in large quantities of late June produced eggs spoiling before they reached market.

By selling off the male birds which are not to be carried over for breeders another season on the 15th of May and separating the breeders on that date all eggs from unmated hens after the first of June should be infertile and not so susceptible to the summer heat.

Of course, the quality of any egg will depreciate if it is left in a hot room for several weeks, but the main loss in infertile eggs is through evaporation, as no blood spots or rots will develop in infertile eggs, no matter how hot the temperature becomes.

Don't Save a One.

Selling off all but one male bird from a farm flock does not improve the keeping qualities of eggs produced from that flock, for there will be enough fertility present in almost every egg to cause some development of the life, and as soon as the life dies from shock or weak vitality the decomposition of the egg content proceeds rapidly. If anyone is going to leave one male bird with the flock they might about as well leave all the male birds, except that there will be less fighting if only one.

Another inducement for selling off the male birds at this time is to save cost of feed for about nine months. At the present cost of grain a rooster of unknown ancestry will eat enough food between now and next breeding season to buy a good bird, or at least as good a one as he is.

"Swatted" 250,000 Last Year.

Poultrymen who have several roosters to dispose of at this time should try crate-fattening the birds, to put on weight and make their flesh tender. Everyone knows how tough is the meat of an old rooster which has not had any special fattening attention.

But if the same tough old bird is shut up in a small crate and fed all the corn meal and sour buttermilk he will eat for 12 to 14 days the consumer might think he was eating young turkey if the bird were served as such.

There are a number of feeding stations in Missouri where the old roosters and old hens are placed on the above diet for a few days and then sent to market as the choicest product of the poultryman's raising.

After the poultryman finds out how good a crate-fattened rooster is, he will always prepare all the birds needed for home consumption that way.

About 250,000 Missouri roosters were sent to market last year during the "swat-the-rooster campaign, and it is the hope of the egg handlers of Missouri that twice that number will be removed from the flocks this year

GO OVERLAND TO FAIR.

Two Grant City Boys Start for Pacific Coast in Buggy.

Walter S. Bond and Fred Shipley of Grant City left this week for the Panama-Pacific fair at San Francisco, each in a buggy drawn by one horse. They will take considerable time enroute to sight seeing, and expect to earn part of their way across the western half of the continent.

Both of these young men were born and reared in Worth county. Fred Shipley is a son of Mrs. Susan Shipley of Grant City and attended the Grant City high school. Walter Bond, a son of Mr. and Mrs. W. R. Bond of Grant City, was also graduated from the Grant City high school in 1906 and from Westminster college at Fulton in 1910.

A Good Excuse.

One day last week, while a North Main street man was busy cleaning up his back yard, a hungry hobo called and asked for food. He was promised a good dinner if he would assist in cleaning up the yard. Being hungry, the hobo agreed, and was put to work carting soil in a wheelbarrow.

Willie disposed of several loads while the owner stood watching.

"Say," remarked the man, "Do you always juggle a wheelbarrow that way?"

"Sure," answered the hobo; "what's the matter with my performance?"

"Nothing," returned the man, "only you ought to push a wheelbarrow, not pull it."

"I know," admitted the tramp mournfully," but I can't bear the sight of the cussed thing."

Circle to Meet.

The Queen Esther Circle will meet Saturday afternoon at the home of Miss Mary Sewell, 1003 North Main street.

To Entertain P. E. O. Chapter.

Mrs. Wellington Dusenberry will entertain the P. E. O. chapter at her home, on West Fourth street, at 2:30 o'clock tomorrow afternoon.

Wade Harlan Ross.

Mr. and Mrs. Wade Ross of Quitman announce the birth of their son yesterday morning. The child has been named Wade Harlan.

Literary Societies Picnic.

The Philomathean and Eurekan Literary societies of the State Normal enjoyed an indoor picnic supper last night in the Normal building. About seventy-five students participated.

Society to Meet.

The Young Women's Missionary society of the First Methodist church will meet at 2:30 o'clock Saturday afternoon at the home of Miss Kate Willis, 107 North avenue.

The Misses Remus to Entertain.

Misses Margaret, Frances and Kathryn Remus will be hostesses Saturday afternoon to the King's Herald band of the First Methodist church, which will meet at the Remus home, 620 West First street.

Dinner Party.

Mr. and Mrs. B. E. Pfeiffer of Pickering entertained with a dinner Wednesday, complimentary to Mrs. Pfeiffer's aunt, Mrs. James Chambers of Loveland, Col. The guests were Mrs. Chambers, Mrs. Charles Cockayne and son of Maryville, and Mrs. Mary Chambers of Hopkins.

Family Reunion.

Mrs. C. E. Gregory will leave tomorrow for Mt. Ayr, Ia., where she will attend a reunion of the Larmer family, which will be held at the home of Mrs. Gregory's sister, Mrs. A. M. Soules. The gathering is held in honor of an uncle, Alexander Larmer, who is making his first visit in forty-six years with the members of the family living in Iowa and Missouri.

Pueblo Visitors Here.

Mrs. Francis Totterdale and her sister, Mrs. S. J. Richardson, and Mrs. Totterdale's daughter, Mrs. Joseph Lou McKee, and small son, Joe, arrived in the city at noon today to visit at the home of Mrs. Isabelle Worst, a sister of Mrs. Totterdale, and Mrs. Richardson and other relatives in the city. The visitors are former residents of Maryville, leaving here a few years ago to make their home in Colorado. They expect to remain several weeks.

K. of C. Social.

The Knights of Columbus will hold their first social evening since the closing of the Lenten season tonight at 8 o'clock, in their rooms in Ryan hall, on North Buchanan street.

Lodges Enjoy Social Evening.

The Royal Neighbors and Modern Woodmen lodges held a social evening last night at their hall, on Main and Third streets. Piano numbers were given by Miss Hilda Lahr and vocal numbers by George Roberts and Byron Oliver. Various games were enjoyed and a supper served.

Holds Final Meeting.

The final meeting before the summer's adjournment was held by the Modern Drama department of the Twentieth Century club last night in the tea room of the Elks club. The study period was devoted to "Sweet Lavender," by Pinero, and the book review was given by Mrs. Walter Hanson. At a business meeting, which was held for the adjustment of the year's work, department officers were elected for next year. Those chosen were Miss Beatrix Winn, chairman, who was re-elected; Miss Mildred Miller, vice chairman, and Miss Kate Schenck, secretary-treasurer. A decision was also given for the money on hands to be used in the purchase of books for the coming year's study. Mrs. Berney Harris was a visitor at the meeting.

The Lowly Corn Cob Pipe.

There is virtue in a corn-cob pipe. Many women will deny this. Some, who have endured this herculean odor for the sake of the quieting effect it seemed to exert over a husband who is given to occasional manifestations of ill temper, will declare that while it may be virtuous at times, it is never more virtuous than whe reposing in an airtight fruit jar on the cellar stairs.

Nevertheless, the corn-cob pipe is not a thing to be sneered at. It is a democratic institution. One evidence of the fact that this country is not so democratic as foreigners believe, is that according to the code of an American gentleman, the corn-cob pipe must not be smoked while wearing a silk hat. But some men find difficulty in adapting themselves to the "Missouri meerschaum."

They contend that the first puff from a new cob pipe is like a breath from the nether regions. This aversion arises from the circumstances that, like a sponge, a new cob pipe should be dipped in water before it is used. After the first pipeful of tobacco has been smoked, it will be found that a liberal coat of ashes has attached itself to the walls of the pipe, rendering it thereafter much less likely to burn the tongue than if it were initiated without the formality of baptism.

There is one place, however, where the corn cob pipe is distinctly dangerous, and that is in the mouth of a beginner in the mellow art of smoking. Mothers who dread the day when their sons shall feel obliged to assert their entrance into man's estate by acquiring a taste for tobacco, will do well to buy a corn-cob pipe and leave it carelessly about the house. In time it will be missed. So will the boy's appetite. But the appetite will come back.—Indianapolis News.

A Talk to Mothers About Croup and Cold Troubles

The New Treatment With Fresh Air and Antiseptic Vapors That Does Away With Injurious Internal Medicines, Flannel Jackets, etc., etc.

All mothers are "home doctors" when it comes to treating the croup and cold troubles that all children are heir to. They know that growing children need outdoor exercise, and that, with outdoor exercise, some colds are bound to come. They know, too, that internal medicines injure delicate little stomachs, but that these colds must have some kind of treatment.

The answer to this problem is the "external" treatment, Vick's "Vap-O-Rub" Salve. For the many forms of cold troubles, from head colds, asthma and catarrh, down to sore throat, bronchitis and deep chest colds Vick's will be found better than internal medicines. Just apply Vick's well over the throat and chest, covering with a warm flannel cloth. Leave the covering loose around the neck so the vapors, released by the body heat, may be freely inhaled. The next morning the head is clear, phlegm loosed, and soreness gone.

No one realizes the value of an external treatment better than the skilled druggist, and while the profit is not as large on Vick's "Vap-O-Rub" as on internal preparations, the druggists listed below are anxious that their customers should know of this new treatment. They are, therefore, offering Vick's in the three sizes—25c, 50c or $1.00, on 30 days' trial. With each sale is given a refund blank—good for your money back if not delighted.

PICK BARNARD SCHOOL FACULTY

Miss Bessie Cox, Assistant Principal in High School—Other Members.

Miss Bessie Cox, teacher in the Graham public schools, the past term, was elected assistant principal of the Barnard high school, last night by the school board. She is a daughter of Mr. and Mrs. John Cox of Maryville. She succeeds Miss May Ives.

The other members of the Barnard school facutly were selected several days ago. They are: J. W. Pierce, of Blythesdale, principal, to succeed D. D. Hooper, who becomes principal of the Bolckow school; L. Mendenhall retained in grammar or sixth, seventh and eighth grades; Miss May Nelson, retained in intermediate grades; Miss Mayme Armstrong, retained in primary grades

IS ON TEXTBOOK COMMISSION

Dean G. H. Colbert, Appointed on the County Body—Also Recommend W. M. Westbrook.

Dean G. H. Colbert of the Normal faculty was appointed on the Nodaway County Textbook Commission, late yesterday afternoon by the county court to succeed C. A. Hawkins of the Normal faculty. Another member will be appionted soon by the state department of education. Prof. W. M. Westbrook, superintendent of the city schools, has been recommended. The chairman is Bert Cooper, county school superintendent.

The purpose of the commission is to select text books for the public grade and high schools of the county. There will be few if any changes to be made prior to the 1915-16 term, however.

175 Enter St. Joe Meet.

Five schools, with 175 entries, are to participate in the annual Missouri valley inter-scholastic track meet at Lake Contrary, near St. Joseph, tomorrow. They come from the three states of Missouri, Kansas and Nebraska.

Hold Annual Party.

The annual party given by the juniors of the State Normal school to the seniors of the school will be held at the Normal today.

FEW ALIENS INTO STATE.

Influx Into Missouri Decreases 76 Per Cent Since War—Fewer Leave.

The effect the European war had on foreign immigration into Missouri during the first eight months of its progress, is dealt with in a bulletin of the bureau of labor statistics, for publication by Commissioner John T. Fitzpatrick. There was a falling off in the number of aliens who entered of 76 per cent when comparisons are made with the monthly average of the fiscal year which closed June 30, 1914.

"During the fiscal year which closed June 30, 1914, the twelve months preceding the war, 13,781 men, women and children from foreign countries entered United States harbors with Missouri as their direct destination, or a monthly alien influx average of 1,148. For the eight months commencing with the war and when the fiscal year just given closed, and ending February 28, 1915, only 2, 183 aliens arrived bound for this state, or an average of 278 a month. February, 1915, held the worst record of the eight months, only 84 coming into Missouri in those twenty-eight days.

During the fiscal year ending June 30, 1914, 2,744 emigrant aliens left Missouri for their former homes in other countries, or an average of 228 a month. For the period since the war commenced the Missouri average of those returning home was 155 a month or 73 less than the departures before the war.

The love of the French for the place of their birth seems to be stronger than that of the other nationalities involved in the conflict, the number of those departing since July 1, last, having increased 267 per cent For former subjects of Great Britain the departures after the war decreased 8 per cent

German born subjects make even a worse showing, but this is chiefly due to the fact that traffic with Germany ceased with the first battle and that the blockade the allies have established around that country is so effective patriotic Teutons cannot slip through, the number of those returning since the war having decreased 67 per cent. The Austrian and Servian showing is about the same.

To Play Bedford Sunday.

The Hopkins base ball team, which defeated the Maryville All Stars last Sunday by a score of 13 to 10, will play the Bedford, Ia., team at Athletic park, Hopkins, next Sunday.

HOW TO KEEP MOTHS AWAY.

Repellants Do No Good Unless Eggs Are Brushed from Clothes.

The various substances used to keep away moths, such as tobacco, camphor, naphthalene cones or balls, tarred paper and cerad chips have no effect if the eggs are already present in the clothes, and entomology specialists in the United States department of agriculture therefore recommend a thorough beating, shaking and brushing of all articles likely to attract moths, before they are laid away for the summer.

The brushing of garments is especially important in order to remove eggs which may have escaped notice. If the articles are quite free from eggs or larvae when laid away, the odor from the various repellants already mentioned or from cedar chests and wardrobes will serve to keep the moths away. This odor, however, lessens with age, so that the protection it affords is greatly decreased after a few years. For this reason when furs and other valuable garments are wrapped in tarred paper or placed in sacks of tarred paper these containers should be renewed every year or two.

In general moths are likely to affect only articles which are put away and left undisturbed for some little time. Apartments and closets that are frequently aired and swept are not apt to be seriously affected. In fact, airing and sunlight are probably the best as well as the oldest remedies.

Where circumstances demand that the articles be put away, however, a convenient and effective device is to place them in large pasteboard boxes such as tailors use and gum a strip of wrapping paper around the edgs to as to seal up the box completely and leave no cracks.

If the garments have been thoroughly cleaned before being placed in these boxes, no additional protection is necessary and there is none of the objectionable odor which is characteristic of so many moth repellants.

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

When adding electrolyte to a storage battery, should it be done when the battery is discharged, and, if so, how can one tell when the proper amount has been added?

Distilled water should be added before the battery is placed on charge. The solution should cover the plates. In some batteries the level is one-half inch higher than the tops of the plates. A battery can be tested at any time, and obviously the only way to tell whether it is fully charged or not is to test it in some manner, the gravity method usually being used.

What part does glycerin play in an anti-freeze solution?

Glycerin is used in anti-freeze solutions for the reason that it prevents the alcohol in such solutions from evaporating rapidly and thus preserves the power of the mixture to resist the cold.

I would like to have you tell me why I have trouble in starting my car when warm. Several times I have had to get help from some one who could spin it. Spinning always starts it, but this I am unable to do. It always starts readily if thrown into high when rolling down a grade.

The fact that you have no trouble in starting the motor when cold would indicate immediately that the trouble is not in the ignition system. If you will try a slightly richer mixture on the carbureter it may relieve the trouble. Another possible cause is that the valves may be adjusted too close so that when cold they close, but when warm there is an air leak that dilutes the mixture. Carbon trouble also acts this way at times, and if the motor has not been cleaned out lately it is suggested that the carbon be removed. Another possible feature which does come under the head of ignition is that the dry batteries may be weak.

In drilling holes in pistons to make them lighter how much can be taken off and how should they be drilled?

You can safely drill eight three-eighths inch holes equally spaced around the piston. In drilling place a cylindrical block of wood in the piston, the wood just fitting. This will prevent the metal from cracking. You can hold the piston under the drill with your hands.

Would a good iron rivet be suitable to rivet a front cross member to the frame on a light car or should it be put on with steel rivets?

Good iron rivets would be suitable to use on the frame of a light car. The principal stress endured by these rivets is one of sheer through the tendency to rack on the part of the frame. A great deal depends upon the manner in which the riveting is done. For instance, it has been shown in experimenting that a rivet is 6.5 per cent weaker in a drilled hole than in a punched hole and that by rounding the edge of the rivet hole the apparent sheering resistance is increased 12 per cent. It is also true that sheering resistance is probably less for double than for single sheer, and this is probably due to the unequal distribution of the stress on the two rivet sections. Experiments on the sheering strength of iron and steel rivets would indicate that the proportion of iron to steel is as 19 to 22.1. This ratio is said to be valid only if the sheer is in a plane perpendicular to the direction of rolling, which would be approximately the case in your cross frame connection.

What are the advantages and disadvantages of the disk friction chain drive compared with other types of transmission now more commonly used?

The advantages of the friction transmission are that it offers an infinite number of gear ratios, is silent, cheap to manufacture and simple. The disadvantage is that the friction disk must be renewed every few thousand miles. This is a small matter, but worth noting, and the amount of horsepower it will transmit under the conditions found in automobile design is limited. Therefore it has never been used to any extent on large cars, but has found favor on some cars of medium size and on more small cars.

The gear set of my car is of the planetary type. When the low speed pedal is pushed down to start there is a knock heard from the gear set at regular intervals. What is the cause of it?

Owing to the speed of the motor in starting out on low speed the knock you speak of possibly is at the outer bearing or transmission shaft bearing, where the car is cranked. The dust and dirt continually working in this babbitt cut out the bearing sufficiently to produce a knock at this point. This bearing has a babbitt lining and must be poured to fit the shaft.

Please explain whether there would be any advantage gained by fitting aluminium pistons?

Aluminium pistons are lighter and reduce the vibration because of their light weight. The expansion of aluminium under heat is greater than that of cast iron, giving great difficulty in determining clearance.

Will slightly rotating the poppet valves of a motor prevent the valves from improperly seating and carbon from forming on the valve seats?

Oscillating the valves will tend to keep the seats clean and thus the valves will be found to seat more uniformly. Naturally, this will also prevent the accumulation of carbon in any quantity on the seats.

My motor skips when running slowly or pulling hard on high gear if the spark lever is advanced more than half way on the quadrant. As soon as I retard the spark below this point the engine picks up and will pull as well as it ever did. Why is this? It is not the fault of the carbureter, as I have tried all kinds of adjustments and have operated it under every condition.

If the magneto is correctly timed it is probable that the trouble is due to weak magnets. When the spark lever is advanced all the way the spark actually occurs when the armature is at the edge of the magnetic field instead of being in the position where the strength of the field is greatest. Therefore if the magnets are weak the effect must first be felt at the weakest point in the field, and that may be either a position of great advance or retard, depending on how the magneto is linked up. Recharging the magnets should remove the trouble.

I have a bent steering knuckle. Should this be straightened when cold or hot?

The knuckle should be straightened when hot. It is better to put in a new one, however, as it is difficult to straighten it so that the wheels will run true. If the bend is in the spindle there is no possibility of straightening it satisfactorily, and even if only the arm is bent it will be hard to true it up.

Are the so called anti-rust preparations injurious to the cooling system?

We have no reports where any of the preparations which are on the market that are sold especially for automobile radiators have done any harm. There are occasions, however, where boiler compounds have been used which contain corrosive substances that have acted injuriously on the radiator and water connections. For this reason before using any preparation it should be known that it is intended particularly for radiators and nothing else.

How far apart should the spark plug points be, using a high tension magneto?

The usual point clearance is one thirty-second inch, but many find that even a smaller clearance is better. If the plug points are too far apart you will soon be aware that something is wrong, as the motor will start to miss, particularly when the car is running slowly.

We would appreciate your telling us how to correct the oiling system in a new car which has given trouble since it left the factory. The car has been driven 3,000 miles, so by this time should be thoroughly "worn in." The trouble is that oil works up into the first and fourth cylinders.

Faulty piston rings seem to be the only condition which would give the oiling trouble you mention. It may be that the joints of the rings, which are of the ordinary eccentric type, have become aligned, leaving a passageway for the oil to enter the combustion space. Another possibility is that you have too much oil in the crank case, which causes a greater supply than necessary to be thrown up. It would seem that the best step to take would be to remove the pistons and examine the rings on the cylinders that give the trouble. The pistons can be removed by taking off the lower half of the crank case, removing the lower connecting rod bearing cap and withdrawing piston and connecting rod assembly. A replacement of the rings should eliminate the difficulty.

Can gas such as generated from carbide be used in an automobile engine?

Yes. Occasionally we hear of a motorist driving home on acetylene gas when his supply of gasoline is exhausted. The objection to the use of this gas is that it is much more expensive than gasoline.

The storage battery seems to charge on my car so that it will furnish current for the lights and start the motor; then suddenly it will become discharged. Where should I look for the trouble?

From the information you furnish it would seem that the battery is either completely discharged or you have a short circuit in the system. It would seem quite likely that it is the former, and if this is the case a thorough recharge will remedy the difficulty unless the battery has been left in the discharged condition for too great a length of time. If so, the battery will probably require overhauling. The symptom for this trouble is exactly what you describe—the battery starts the motor and also gives a very bright light for a few moments and then apparently is dead.

IT IS SPRING FEVER TIME.

Is Not Disease, But Condition—Change of Diet and Clothing.

It is the "spring fever" season—the time when a fellow feels like doing nothing with all his might—the time when we account for our antipathy to work with the statement that "it's spring fever." There is really no such disease as spring fever, but there is such a condition.

It is due to the fact that warm weather comes before the body is prepared for it. We have gone through a season's cold. The blood has become thickened from the heavy foods that have been eaten. Nature put us in proper shape for enduring the cold, but we are plunged into the heat before we have had time to fit the blood and nerves and muscles for the higher temperature; in many instances, in fact, before we have even changed the clothing to the requirements of the warmer days.

So we find ourselves easily "tired out," at this season of the year. We have trouble in "getting up stream." There is an inclination to sit down and rest—and we yawn and "strench," and feel uncomfortable, and talk about "spring fever."

The remedy for the languor that comes with the spring-time is a change of diet, as well as a change of clothing. Fruits and vegetables will do the business. Nature sends the products of the soil as they are consumed early. Rhubarb, lettuce, asparagus, "greens"—these are the things which come early and which are the correct remedy for "spring fever." Then there is the old-fashioned remedy for "thinning the blood"—sassafras tea.

Nothing better has ever been compounded or invented or grown from the ground. It will do the business. The old-time folks had some homely remedies, and some homely philosophy. Sassafras tea is a remedy, and its use in the spring-time is philosophical.

A Food and Nerve Tonic
is frequently required by old age. We always recommend
Rexall Olive Oil Emulsion
containing Hypophosphites
as an ideal combination for this purpose.

SUFFERED 15 YEARS, CURED IN 21 DAYS

Astounding Cures Made by This Remarkable New Discovery.

Gentlemen: For over fifteen years I was afflicted with eczema, covering my arms, legs and face. I suffered so much distress that I could not sleep. My face was red and swollen, and covered with dry, feverish scales. I was unable to attend to business for weeks at a time.

I had about given up all hope when I tried your remedy, Amolox. The first application gave me relief so I could sleep. After applying it for several days I was able to attend to business. After thirty days' treatment my eczema entirely disappeared.—James R. Rigby, Youngstown, O.

Amolox is the prescription of a physician who used it with wonderful success in his private practice. Now, for the first time, offered for sale by the leading druggists.

Amolox Ointment will quickly banish pimples on the face, blackheads, and all minor skin troubles. Chronic cases of Psoriasis, Salt Rheum, Tetter, that have suffered for years, require both the Ointment and Solution to effect a cure. Trial size, 50c. Guaranteed and recommended by the Orear-Henry Drug Co.

Jefferson Broyles.

Jefferson Broyles was born in Tennessee, September 8, 1835; died May 4, 1915. He lived in Atchison and Nodaway counties since he was 8 years old. He has lived on a small farm west of Maryville for the past forty-five years. He was married to Angeline Shields, March 5, 1855, who survives him. Ten children were born to this union, four of whom live and were at the funeral.

They are Asa J. Broyles of Broken Bow, Neb.; Mrs. C. E. Closser of Kansas City, Mrs. D. T. Dalrymple and Mrs. Nick Thull of Pickering. He had one brother, Solomon Broyles, who was chief of police in St. Joseph for twenty years, he has one living brother, Asa Broyles, west of Maryville, who is 82 years old.

His father, Richard Broyles, was one of the early settlers of the Platte purchase, and died a few years ago at the age of 94. He has one half-brother, Richard Broyles of Clearmont, and two half-sisters, Mrs. Mary Ferguson of Burlington Junction and Anna Broyles. Mr. and Mrs. Broyles have been in very poor health for several years and lived on their little farm alone. Their wants were looked after by Mr. and Mrs. William Job, who lived near them.

It became necessary a short time ago to take Mr. Broyles to State hospital No. 2 at St. Joseph, and their home was broken up. When he died, Mr. and Mrs. Job had them bring the body to their home, where the funeral was held Wednesday afternoon, conducted by the Rev. Burger of Quitman.

Your "Traveling Home" to California Expositions

Going to California even the most direct way requires days—not hours—long enough for you to experience either restful home-like **satisfaction**, or restless **discomfort**—irritation. Make a careful choice of routes—based on **Service.**

Service is the big individual feature of the Burlington—and travel-wise people know it. The roadbed is smooth, the maximum of safety insured, train equipment the last word in luxury. Berths are like "home beds." The meals are tasty and varied—reasonable in price—and well served. Burlington trains have all the little added features that distinguish modern "limited" travel. And best of all, Burlington employees are as courteous as they are efficient. They help speed the days—point out and intelligently explain the wonderful country you traverse.

Because of the liberal provisions of the Burlington's Grand Circle Tour, you can stop over at any point. But, if you go straight through, you arrive refreshed—becauses of pleasant days and comfortable nights.

This is the tour de luxe—the Burlington's Grand Circle—through glorious Colorado; Denver, the new Rocky Mountain National (Estes) Park, Colorado Springs, Pikes Peak Region, Royal Gorge by daylight; daylight view of Salt Lake City and Great Salt Lake. Then, Los Angeles, San Diego exposition, and the Panama-Pacific. An ocean trip by steamer to Portland; the great Pacific Northwest. And homeward bound, via Glacier National Park or Yellowstone Park.

Come in and get your copy of our California Expositions folder.

PAVE MULBERRY, AND THOMPSON?

REMONSTRANCES ON THOSE TWO STREETS NOT ENOUGH, BELIEF.

FIFTH AND NINTH PAVING ASSURED

Council Passes Improvement Ordinances Tonight After Inspecting Opposing Petitions.

It now seems certain that at least ten blocks of paving will be added to the credit of Maryville this spring as a result of eight resolutions to pave thirty-nine blocks adopted recently by the council. The time for filing remonstrances ended last night. The city council will meet tonight to examine the various remonstrances and decide what pavement to order. Remonstrances were circulated and filed on all but one of the twelve streets on which paving was proposed. It now seems certain, however, that one on which a "kick" was filed will be paved just the same, while two more are in question. Although an effort was made to oppose the paving on Fifth street from Market street, west six blocks to Dunn street, no remonstrance was filed.

A remonstrance was filed against paving Ninth street from Mulberry to the east line of the Normal grounds, but there were not enough names to down the proposition, so that, too, will be paved.

Thompson May Be Paved.

A petition signed by twenty-nine persons also was filed, remonstrating against the paving of Thompson street from Walnut street east four blocks to Main street. It appears now that many do not belong on the petition, some not owning property along the blocks proposed for paving.

An investigation made by Harry Snyder, abstracter, this morning, brought out the fact that of the twenty-one eligible property owners along that street eleven had signed against the paving, which would give them one majority, unless some other finding is made before the council meets tonight.

May Pave Mulberry, Too.

Mulberry street, from Ninth to Twelfth streets, also may be paved, despite the fact that a remonstrance signed by ten was filed. The abstracts along this street also are being examined with the belief that some signers do not belong on the petition.

It appears that all others are killed, however, unless it is on West Third street, where the change of one or two names would throw it into the list of those streets to be improved. It is said that one owner has expressed a willingness to favor the paving, even though she opposed formerly.

Each of the resolutions provided that the paving be a bituminous product, while the ordinances to pave Fifth and Ninth street will probably provide for asphaltic concrete, one form of bituminous paving. No brick is provided by the resolutions.

Must Advertise for Bids.

The paving ordinances made out today by City Attorney W. H. Crawford for each street proposed for paving, provide that where ordinances to pave are passed the city engineer shall advertise for bids for paving at least one week, and to express at that time the date the bids are to be in.

The ordinances provide that the contractor shall do all work and furnish all material. It is planned by City Engineer F. L. Flynt to rush the preliminary work along, so that actually paving might begin as soon as possible.

BUYS FANCY BEEVES.

Forsyth Packing Company Invest in Car Load of Local Cattle.

The Forsyth Packing company purchased this week of Hal T. Catterson a car load of fancy cattle to be killed and dressed for their retail trade.

All of the beeves are young corn-fed Shorthorn stock, raised on Mr. Catterson's farm, north of the city. The cattle will be fed and held at the Forsyth plant, northeast of the city.

W. C. Risser of Burlington Junction was in Maryville last night.

BURNED BY GASOLINE STOVE

Mrs. August Stapler Has Second Mishap in 3 Months—Home Damaged by Fire.

For the second time within three months Mrs. August Stapler, 309 West Fifth street, was burned about the limbs and body at 9 o'clock this morning, when a gasoline stove exploded.

Immediately Mrs. Stapler threw the stove into the yard, but not before being burned. The burning stove also ignited the floor and roof of the porch. The flames spread to the house siding, doing about $75 total damage.

The fire department responded, but neighbors had succeeded in quenching the flames within a short time.

BALCONY FALLS, 2 INJURED

Burlington Junction Youths Listening to Booster Band, Take Tumble—One Dislocates Shoulder.

Frank McGrath, 14 years old, had his left shoulder dislocated, and Margaret Caldwell, 10 years old, suffered a spinal injury, perhaps seriously, when the balcony of the old city hall at Burlington Junction collapsed yesterday afternoon. The youngsters had climbed on the old building in order to better see and hear the concert given by the St. Joseph band, which accompanied the St. Joseph Commerce club on its trade excursion yesterday.

The old balcony, weakened anyway, was insufficient to withstand the weight of the several youths, and fell to the ground, a distance of about ten feet.

BUSINESS FUTURE BRIGHT.

Wabash Hauls Many Loaded Cars Now —May Improve Roadbed.

That the future looks bright to the Wabash Railroad company is evidenced by the activities being taken by the officials in the way of proposed improvements along this line of the company. It is said between twenty and forty loaded freight cars go east daily now, compared to about two-thirds that number during the winter.

Local Organizer Clark was over the line a few days ago inspecting telegraphic equipment and taking an inventory of stock. It is presumed that an increase to the telegraphers' pay is contemplated.

There also is rumor that the Wabash will reorganize soon with $120,000,000 less capital, the same to be used in roadbed, rolling stock and station improvements over the entire system.

RALPH FARMER WINS HONORS.

Makes Record in Two-Mile Run at Oberlin Athletic Meet.

Ralph Farmer, the son of Mr. and Mrs. S. E. Farmer of 722 South Main, who is a student at Oberlin college, Oberlin, O., won one of the high honors in athletics at the triangular meet between Oberlin, Wooster college and Reserve Polytechnic schools, held at Oberlin, taking first place in the two-mile run. Young Farmer has taken second place twice before in this same event, winning in the inter-class and inter-college track meets.

Mr. Farmer has also been elected editor-in-chief of the Oberlin Review, the official college newspaper. The young man is now in his third year at Oberlin, and has been making a number of good records for himself during this time.

RURAL CHURCHES HOLD SERVICE

Mt. Zion and Swan Chapel Will Observe Mother's Day.

The Mt. Zion and Swan Chapel Methodist churches, in the Graham district, will observe Mother's day Sunday with a special service and an appropriate sermon by the pastor, the Rev. G. C. Wadding.

The service at Mt. Zion will be held at 11 o'clock a. m. and the one at Swan Chapel at 3 o'clock in the afternoon. Arrangements have been made for the Graham orchestra to attend both these services, it is expected that every auto or carriage owner plan to bring some one, particularly the old people, to the services.

TO FILL CITY JOBS

COUNCIL TO MAKE NINE APPOINTMENTS TONIGHT.

TO CREATE NEW OFFICE

William Mozingo to Be Street Cleaner —Plan Sidewalks in South End— To Change Cemetery.

A busy session of the city council is expected tonight as the result of the paving ordinances to be considered, the appointment of nine city officials, the creation of a new city position and the transaction of other special and the routine business. The paving propositions will require most of the time of the officials, it is expected

With that out of the way, will come the appointment of the various appointive officials virtually decided on at a special session of the council Wednesday night, as exclusively reported in The Democrat-Forum yesterday.

An ordinance bill to create the office of street cleaner also will be presented. William Mozingo was decided on for that position. The bill as prepared by City Attorney W. H. Crawford, provides that this official's duties shall be "to clean the streets of the city of Maryville, to remove all earth or offal, and do such other work as the street committee of the council may direct him to do."

Change in Another Office?

Mr. Mozingo will be expected to furnish a team, wagon and harness, and shall work ten hours per day at such periods as are designated by the street committee. He will receive $75 a month.

There is a hint that with the creation of the office of street cleaner there may be a change as to city engineer. There is talk among some of the councilmen of either abolishing the office part of the time each year or reducing the salary. An effort was made last fall to abolish the office through the winter, but it failed.

The offices of city engineer and street commissioner were merged last spring and F. L. Flynt appointed to hold both as city engineer. He receives $100 a month.

To Build South End Walks.

An ordinance bill also has been drawn up providing for the building and construction of sidewalks on the east side of Market street between Grant and Leiber street, a distance of four blocks, in the south extreme of the city, and also on the north side of Leiber street, between Market street and the city limits.

A petition signed by more than ten residents of that part of the city has been filed with the city council. The walks are to be four feet wide. All property owners are to construct the walks within thirty days after the passage of the bill.

Another ordinance bill for the exchange of a tract of land at Oak Hill cemetery, as considered last month, has been prepared for consideration tonight. The city proposes to trade a certain portion of the tract to Dennis Morrissey for some land owned by him there.

TO ATTEND RAILROAD MEETING.

W. E. Goforth Will Address Conference of Burlington Representatives.

W. E. Goforth, agent of the Burlington, will leave tomorrow for Creston, Ia., where he will attend a meeting of railroad representatives, to be held at 2:30 o'clock Sunday afternoon.

Mr. Goforth will make an address on the subject "Improved Methods for Safe Transportation of Merchandise."

The meeting is a "get together" council to discuss matters for the mutual interest of the company and employes. Mr. Goforth will return to Maryville Monday morning.

Arrive from Kansas City.

Mr. and Mrs. Joe Brown and children, Fredda Josephine and Joe, Jr., arrived in Maryville last night to visit Mrs. Brown's parents, Mr. and Mrs. Fred Hastings.

MRS. ELEANOR REDMOND DEAD.

Body of Former Resident Brought to Maryville for Burial.

The body of Mrs. Eleanor Redmond, a former resident of this city who died yesterday at the home of a daughter in Marysville, Kan., will be brought to this city for burial, arriving over the Burlington at noon tomorrow.

The body will be taken from the station directly to St. Patrick's church, where funeral services will be conducted by the Rev. Father Henry F. Niemann. The body will be buried in St. Patrick's cemetery beside that of her husband, John Redmond, Sr., who died a number of years ago.

Mr. and Mrs. Redmond were among the pioneer people of the county and well known among the older residents. When they came to Nodaway county they settled on a farm northwest of the city, and after her husband's death Mrs. Redmond lived on the farm until about twelve years ago when she went to Kansas to make her home.

LUSITANIA IS SUNK

LARGEST PASSENGER STEAMER, 1,310 ABOARD, TORPEDOED.

WARNED OF SHIP'S FATE

Many Abandoned Voyage at New York When Mysterious Prediction is Made of Disaster.

By American Press.

LONDON, MAY 7 (3:45 P. M.)—THE LUSITANIA SANK AT 2:33 O'CLOCK THIS AFTERNOON. PASSENGERS ON BOARD BELIEVED TO BE SAFE.

LONDON, MAY 7 (2:45 P. M.(—THE CUNARD LINER LUSITANIA, CONSIDERED THE LARGEST PASSENGER SHIP AFLOAT, WAS SUNK OFF OLD HEAD, KINSALE, BY A TORPEDO TODAY. ASSISTANCE HAS BEEN SENT. IT HAD 1,310 PASSENGERS ABOARD.

The Lusitania, which was sunk off Old Head, Kinsale, Ireland, today, sailed from New York, May 1, on its voyage to Liverpool, which is had nearly reached when torpedoed. Before t sailed from New York more than one hundred anonymous messages were circulated among the passengers warning them that the ship would be sunk before it reached Liverpool. It is an English vessel.

As a result of the prediction many of the passengers abandoned the trip, while 1,310 remained on board. It carried the largest list of second cabin passengers since being built. Among those on board were Alfred G. Vanderbilt, Charles Frohman, Charles Klein, dramatist, and Mr. and Mrs. Elbert Hubbard.

The Lusitania had a speed of twenty-five and one-half knots per hour and was provided with unusual water tight bulkheads. The boilers were placed in the middle of the ship, insuring greater safety. The coal bunkers were thirty feet under water, also rendering fire less likely.

When a near-panic ensued among the passengers after the receipt of the mysterious warnings, a Cunard line official laughed and said. "The Lusitania can show its heels to any submarine."

The German embassy at Washington May 1 also issued an official notice warning Americans to remain off all ships flying the flags of Germany's enemies. Old Head juts out from Kinsol harbor, on the south coast of Ireland.

Mrs. M. Carter returned to her home at Burlington Junction today, after a visit in Maryville with her mother, Mrs. S. J. Wills.

Attention Everybody

Saturday, May 8, is Magazine Day. Place your old magazines on the front porch.

Collection will be made Saturday morning.

City Federation of Clubs

TO SPREAD GOSPEL

BAPTIST MEN'S CLUB START EVANGELISTIC TEAM MOVEMENT.

WILL TOUR DISTRICT

Members Pledge $75 for City Base Ball —Will Assist in Mother's Day Service.

The appointment of a committee composed of Prof. W. M. Westbrook, D. E. MacDonald and Ray Davis to organize five gospel teams was one of the most important transactions at the monthly conference and banquet of the Men's club of the First Baptist church held last night at the church.

The plan as proposed at a previous meeting is to have the gospel teams do evangelistic work throughout the counties of Nodaway, Holt and Atchison. The Nodaway county team will co-operate with the teams selected from the other counties in holding a revival service at each of the thirty-one Baptist churches in the district. Services will also be held in the school houses, and there will be open air meetings.

This campaign will culminate in a general rally to be held at the Baptist church in this city.

The other committees appointed to assist in this work include Captain Charles Hyslop, William Everhart and Eugene Ogden, to chose the place of service, and Ed Brewer, G. B. Holmes, Sr., and J. A. Spires, advertising committee.

About fifty members were present at the meeting last night. The club agreed to sell $75 worth of tickets for the base ball games during the summer and nearly half of the amount were sold last night among the members present.

Arrangements were also made for the club's part in the special Mother's day service to be held Sunday, and a committee was appointed to see that autos and carriages were furnished for all who were unable to walk to the church. This transportation committee is composed of Dr. Karl Malotte, William Everhart and Miss Ada Albert.

A report was also made by the committee engaged in raising a fund of $2,500 for repairing and remodeling the church. Their work has progressed rapidly and has been given a hearty response.

ALLIES USE FIRE SHELLS

Inflammatory Missiles Burn Turk Town—Ship to Shore Fight Continues in Dardanelles.

By American Press.

Dardanelles, May 7.—The artillery exchange between the warships of the allies and the shore positions of the Turks continues. Some vessels are firing from Saros, making use of inflammatory shells. The town of Miados was set on fire yesterday by this means.

WOULD RESTRAIN CHICKENS

Prepare Ordinance to Preserve Gardens and Lawns—Provides Fine For Violation.

An ordinance to prohibit chickens and domestic geese from running at large in the city of Maryville has been prepared by City Attorney Crawford for presentation to the city council tonight. The ordinance was proposed to Attorney Crawford by Councilman Edward Dragoo. The city already has an ordinance prohibiting geese from running at large, but no other domestic fowls. Recently—in fact, each spring—many kicks are registered by residents against the intrusion of neighbors' chickens in gardens and yards.

As a result the following ordinance bill is provided:

"It shall hereafter be unlawful for the owner or person in charge of any chickens or domestic geese to suffer or permit or cause the same to run at large outside of the inclosure of such owner or person in charge of such chickens or domestic geese within the limits of the city of Maryville, Missouri, and any such owner or person in charge of any such chickens or domestic geese who shall permit, suffer, or cause the same to run at large within the limits of said city contrary to the provisions of this ordinance shall be deemed guilty of a misdemeanor and shall be punished by a fine of not less than one ($1.00) dollar nor more than ten ($10.00) dollars for each and every offense."

It does not mention ducks, turkeys nor guineas, however.

MISSOURI SOUVENIR SPOONS

On sale Friday and Saturday at Alderman-Yehle's, 10c each. Start your collection now.

AUSTRIA IN BIG ADVANCE

Russians Lose Ground and Men in Danger of Annihilation—Teutons Capture Tarnow.

Special to the Democrat-Forum

London, May 7.—That the Austrian forces are slowly forcing the Russian lines back and that part of the Slavish armies are in danger of being annihilated seems eminent from dispatches received here from the front. According to a dispatch from Vienna the Austrian southern wing has crossed the Wisloka river and that the Russians are retreating east of the Lupkow pass.

The Austrians also have occupied the heights east of the Dunajec and the Biala rivers and have captured Tarnow, west of Premsyl.

IN TWO CONTESTS TODAY

Four High School Athletes in Trenton and Four in Tarkio Literary and Athletic Events.

Eight boys of the Maryville high school are competing this afternoon in two athletic events of northwest Missouri. Four are contesting in the inter-high school track meet at Trenton and four at Tarkio tri-state events. They also will try for honors in the Tarkio literary contests tonight.

The Trenton contestants are Ellison Frank, George Flemming, Eugene Yehle and Claude Glass. They left yesterday for Trenton, accompanied by E. R. Utter, principal of the high school.

Those trying for honors at Tarkio are Verne Pickens, athletic; Don Roberts and Phillip Colbert, athletic and literary; Miss Georgia Evans, declamation Several other high school students accompanied them there today.

HUGHES BONDS BRING 5 1-2

Local Firm Makes Best of 3 Bids—Gives $251.60 Premium—Are Dated July 1.

The $30,000 bond issue voted March 30 by the voters of Hughes township for bridge improvement in that district was sold by the county court this morning to the Gillam-Jackson Loan and Title company of Maryville, at 5½ per cent interest and $251.60 premium, bonds to be dated July 1, 1915. There were two other bidders, one of which made three bids.

J. H. Sutherlin & Co., Kansas City, made the single mail bid of 6 per cent interest and $377 premium, bonds to be dated July 1.

The William M. Compton company, St. Louis, personally represented by Royal D. Kercheval, made three offers. One provided for 5½ per cent interest, $52 premium and bond date of July 1. Another offered 5½ per cent interest, $115 premium, bonds to be dated June 1. The third offer was 6 per cent interest, $610 premium and bond date of July 1, 1915.

After considerable discussion and mathematical work, the court decided the local bid was best. The sale of the bonds was in charge of George Pat Wright, local attorney.

The bid is considered a good one. The $25,000 road bonds voted last fall by Lincoln township was bought by a Chicago firm through Gillam-Jackson for 5½ per cent interest and only $60 premium.

The Hughes bond interest is to be pain semi-annually. The bonds are to be paid in not more than fifteen installments, the first to be July, 1916, and the last in 1930. They may pay all within five years.

CHINA TO ACCEPT JAPAN'S DEMANDS?

INDICATIONS ARE ORIENTAL WAR WILL BE AVERTED.

JAPS CONTINUE WITH PREPARATION THOUGH

Nippon Army in Manchuria Ready for Emergency—Forces Clash at Tsinan—U. S. to Remain Neutral.

By American Press.

Peking, China, May 7.—The latest indications are that China will accept all the demands made by Japan.

London, May 7.—The Japanese government has sent an ultimatum to China allowing the Chinese government forty-eight hours to accede to Japan's demands. The ultimatum implied that Japan would use force if China's reply was unsatisfactory.

Tokio, May 7.—The army corps stationed at Hiroschima and Okayama already have prepared for eventualities. Hanchuria dispatches say the Japanese are leaving China hurriedly and that Japanese and Chinese troops have clashed at Tsinan.

Washington, D. C., May 7.—In a statement issued last night Secretary Bryan clearly states that the United States will stand absolutely neutral in regard to the Japan-China trouble.

The demands which China has so far granted Japan are: China to grant Japanese the right to work mines in south Manchuria and eastern Mongolia; that all disputes between the Japanese in Manchuria of whatever nature shall be under Japanese jurisdiction; that schools and hospitals may lease land from the Chinese, thereby reserving land ownership; to grant a concession to Japan to build the Nan Chang-Chao-Chow-Fy railway if Great Britain consents to the release of China from the negotiations begun concerning this railroad two years ago.

LOOK OUT FOR FROST.

Government Weather Bureau Warns Against Freezing Tonight—Went to 40.

"Light frost tonight"—Government weather bureau, Chicago.

That is the notice received by J. R. Brink, local recorder, this afternoon. The reading this morning showed a minimum temperature of 40 degrees, but no persons have reported having seen any frost last night or this morning. Nearly the same temperature will prevail again tonight, it is believed.

As it is in the "dark of the moon" it is believed frost is likely tonight. If light, however, there is little danger of vegetables being killed, it is said.

To Give Concert Tonight.

The weekly concert of the Maryville Commercial band postponed last night on account of the weather will be held on the court house lawn tonight instead. The same program as was announced for last night will be given.

Miss Elizabeth Ashford left yesterday for Kansas City to spend a few days buying new summer stock for the Ashford Millinery company.

THE WEATHER

Fair tonight and Saturday; light frost tonight.

There seems to be an era of lynchings on the high seas in which neutral ships and innocent victims are sent to the bottom of the seas for no other reason than that they are away from home.

Before our adorable women take charge of the government we would like to know if they intend to make the men adopt their plan of buying more clothes and wearing less of them.

If insurance rates continue to be raised every time the legislature meets, may it not be necessary to dispense with the legislature altogether?

It looks like the farmers of the west might harvest two crops of wheat this year. We mean two crops measured in dollars. The government crop reports show that there will be an increased acreage and the prospects are excellent for a fine crop. Most of the wheat last year was sold before the high price mark was reached, and the buyers reaped the big profits, but this year, whether the war closes or continues, it looks like high prices will continue at selling time, and that the wheat raiser will get almost double the usual price for his crop. This means a flood of gold into the great west and middle west.

FLIES AND MEASLES.

The health commissioner of Chicago warns the people of that city especially against flies and measles during the present summer. Pointing out the well known habits of the fly in carrying germs and spreading disease of every kind, he urges an organized fight against them. Food should be screened, garbage should be kept closed and stables should be cleaned of fly breeding accumulations. They should not be allowed to reach sleeping babies, and, while they yet few in number, they should be swatted persistently and vigorously.

As to measles, it is one of the most treacherous and contagious diseases known. More catching than scarlet fever or smallpox, it should be avoided. In addition to the large death list to its credit, it does no end of damage to eyes, ear drums and internal organs. Its ravages can be greatly reduced by promptly separating the children when they show the first symptoms and the lives of many little ones may thus be saved.

Letter to Mr. R. S. Braniger.
Maryville, Mo.

Dear Sir: Lead-and-oil is not good paint; don't wear; the rule is, as everyone knows, repaint in three years.

Devoe lasts six, in the same way—allow wide margin in all such statements. What does it mean, to last? It means the same with both.

As to covering: that's another. Here's an instance.

Mr. J. J. Hall, Sheffield, Pa., painted two houses, lead-and-oil; took 40 gallons.

Last summer bought 40 gallons Devoe for the same two houses; returned 10 gallons.

The paint, that covers, lasts; it's all paint, true paint, and full measure. Lead-and-oil is all paint but not good paint; the lead wants zinc. Better paint Devoe. Yours truly,

F. W. DEVOE & CO.,
New York and Chicago.

P. S.—Koch's Pharmacy sells our paint.

FRECKLES

Don't Hide Them With a Veil; Remove Them With the Othine Prescription.

This prescription for the removal of freckles was written by a prominent physician and is usually so successful in removing freckles and giving a clear, beautiful complexion that it is sold by druggists under guarantee to refund the money if it fails.

Don't hide your freckles under a veil; get an ounce of othine and remove them. Even the first few applications should show a wonderful improvement, some of the lighter freckles vanishing entirely.

Be sure to ask the druggist for the double strength othine; it is this that is sold on the money-back guarantee.

To Fight Hog Cholera.

Campaigns against conditions which result in hog cholera and other live stock diseases are being launched in different parts of Buchanan county by Leon V. Crandall, county farm agent, and J. C. Rand, representative of the agricultural college of the University of Missouri. It is planned to have the movement county-wide within a short time. Two clubs have been organized so far.

REVIVAL TO END SUNDAY

Evangelist Thurston Price to Give Special Sermon for "Mother's Day."

The revival service at the First Methodist church which has been going on for the past three weeks, will be brought to a close with the Sunday night service.

Definite announcement of this was made last night by Evangelist Thurston Price, who has been conducting the meeting.

In keeping with the sentiment of Mother's day, Sunday, the Rev. Mr. Price will take for his sermon subject "Home Life."

Tomorrow night one of the greatest services of the week is planned, and the evangelist at this time will preach on the subject "The Mastery of Environment, or How to Stay Religious When the Big Meeting is Over—How to Face the Racket."

Preceding the regular preaching service at 8 o'clock tonight there will be a half hour prayer meeting for everyone held in the basement of the church, beginning at 7:30 o'clock. The subject of Mr. Price's sermon will be, "Sirs, What Must I Do to Be Saved?"

The meetings have been attended with unusual success and the workers expect the number of conversions to be greatly increased by Sunday night.

Crowd Present Last Night.

In spite of the inclement weather of last night the church was filled with interested people. The Rev. Mr. Price spoke from the subject "What Shall the Twentieth Century Man Do With Christ?" saying in part:

"In the words of my text, Pilate asked 'What shall I do then with Jesus, who is called Christ?' And they answered, 'Crucify him! Crucify him!' Pilate took a bowl or a pitcher of water and stood before the people and said: 'I wash my hands of this innocent man's blood.' If Pilate only had realized it that stain wasn't on his hands, that stain was on his heart.

"But the great question for you, and the great question for me is not so much what Pilate, the Roman governor, did away back there two thousand years ago, the great question for us to face is what shall I do with that Christ, or what am I doing with Christ?

"The hour is rapidly approaching—in fact, it is coming in great leaps and bounds, when the tenor of the preaching of every recognized church in America is going to be one thing, and that is, in the human heart there is a throne. Salvation is absolutely tied up in one thing, and that is getting Jesus Christ on that throne. Everything depends upon it.

Three Great Tests.

"There are three great supreme tests that any man that has made a great claim to anything has no right to object if you put him to those three tests. Let us subject Jesus Christ to those three tests.

"First of all, when a man makes any kind of a claim, you have a right to go back to the people that knew him the best. What did that man's message mean to the people of his own day, and how did the thinking, intelligent people take it? Never man spake like that man, that is what his enemy said.

"You have a right to put his claim to the text, what did the people of his day, what did the enemy think of the works that he did?

"His enemy said. 'We know that thou art a teacher come from God. Why do we know that thou art a teacher come from God? Because we have sense enough to know that no man can do these works unless he come from God.'

The Final Judgment.

"Jesus Christ left behind him about one hundred and twenty out-and-out followers, and about three hundred and eighty nominal followers. Jesus Christ has been gone for about two thousand years, and Jesus Christ has about six hundred million followers. Bob Ingersoll left the world about twenty years ago and left about 5,000 well organized Ingersoll clubs, and he has a solitary organization left today."

Mr. Price said if George Washington would come back to earth the people would give him the military salute; if William Shakespeare would return to earth the people will shake his hand, but if Jesus Christ would return to earth the people would kneel to him. He quoted Charles Lamb in this connection, and said "If Jesus Christ should walk in we would all kneel down. The brains of America will salute a Washington, shake hands with a Shakespeare, and go down on their knees to the Christ. What are you doing with that Christ tonight."

Strawberry Shortcake.

Mix and sift two cupfuls of flour, four teaspoonfuls of baking powder, two teaspoonfuls of sugar and one-half teaspoonful of salt; then sift a second time. Work in one-fourth cupful of butter, using tips of fingers, and add gradually three-fourths cupful of milk. Toss on a slightly floured board and divide into two equal parts. Pat and roll and fit into two buttered round layer cake pans, shaping with back of hand to fit pans. Bake in a hot oven twelve minutes. Pick over, wash and hull strawberries, allowing one quart of berries to each shortcake. Cut berries in halves, reserving some of the choicest for garnishing, put in an earthen bowl, sprinkle with sugar, crush slightly and let stand on back of range until warmed. Split hot shortcakes and spread cut side with butter. Put one of the pieces crust side down on hot serving dish, cover with prepared berries, then with a piece of shortcake crust side down. Cover this with prepared berries, then spread top with whipped cream sweetened and flavored with vanilla. Garnish the top with reserved whole berries.

ALFALFA FOR EVERY FARMER.

No Farm Should Be Without Lucerne Patch, Kansas Farmer Says.

Every farmer having a piece of land which will grow it should have that land seeded to alfalfa. We are coming more and more to a realization of the benefits of some alfalfa hay in the ration. This is true not only in the case of dairy cows, but in the case of all other farm animals.

There is only one reason why the hay of alfalfa is superior to the hay of millet or prairie grass. This is because it contains more protein—more muscle building, bone building and milk making feed. If there were a better name for this constituent of alfalfa we would use it.

Plain people are prejudiced against the term "protein" because it is so generally used in the books, but there is no getting away from it. Because this constituent exists in alfalfa in excess of our common feeds is the reason alfalfa hay is so valuable.

It is not necessary that alfalfa hay be grown in quantities necessary to supply all the hay needed for the animal. All we need is enough to balance the ration of corn, kafir or cane silage or the dry roughage of these crops.

If silage is used as the principal roughage, the amount of alfalfa necessary to feed is decreased. There are thousands of farms in Kansas which could grow the alfalfa necessary to properly balance other feeds in the ration. On these alfalfa ought to be grown, even though it is necessary to seed the entire acreage of good land. Yet the sorghum crops will grow on the poor land.—Kansas Farmer.

TO 'SWAT ROOSTER' EARLIER

State Campaign Against Fertile Eggs to Begin May 15, This Year.

The "swat-the-Rooster" campaign has been staged for the middle of May this year, which is three weeks earlier than last year. As eggs will show fertility enough to spoil in hot weather for at least two weeks after the male bird has been removed from the females, the delayed severing of marital relations in the poultry flock last year resulted in large quantities of late June produced eggs spoiling before they reached market.

By selling off the male birds which are not to be carried over for breeders another season on the 15th of May and separating the breeders on that date all eggs from unmated hens after the first of June should be infertile and not so susceptible to the summer heat.

Of course, the quality of any egg will depreciate if it is left in a hot room for several weeks, but the main loss in infertile eggs is through evaporation, as no blood spots or rots will develop in infertile eggs, no matter how hot the temperature becomes.

Don't Save a One.

Selling off all but one male bird from a farm flock does not improve the keeping qualities of eggs produced from that flock, for there will be enough fertility present in almost every egg to cause some development of the life, and as soon as the life dies from shock or weak vitality the decomposition of the egg content proceeds rapidly. If anyone is going to leave one male bird with the flock they might about as well leave all the male birds, except that there will be less fighting if only one.

Another inducement for selling off the male birds at this time is to save cost of feed for about nine months. At the present cost of grain a rooster of unknown ancestry will eat enough food between now and next breeding season to buy a good bird, or at least as good a one as he is.

"Swatted" 250,000 Last Year.

Poultrymen who have several roosters to dispose of at this time should try crate-fattening the birds, to put on weight and make their flesh tender. Everyone knows how tough is the meat of an old rooster which has not had any special fattening attention.

But if the same tough old bird is shut up in a small crate and fed all the corn meal and sour buttermilk he will eat for 12 to 14 days the consumer might think he was eating young turkey if the bird were served as such.

Our line of wedding rings, watches, watch cases, silverware and jewelry of all description are of highest quality, marked with modest prices, and merits your careful consideration.

Honest watch repairing, and the repair of delicate jewelry is our specialty.

Our stock offers many suggestions for appropriate gifts—call on us, you are always welcome.

H. T. CRANE
JEWELER AND OPTICIAN

There are a number of feeding stations in Missouri where the old roosters and old hens are placed on the above diet for a few days and then sent to market as the choicest product of the poultryman's raising.

After the poultryman finds out how good a crate-fattened rooster is, he will always prepare all the birds needed for home consumption that way.

About 250,000 Missouri roosters were sent to market last year during the "swat-the-rooster campaign, and it is the hope of the egg handlers of Missouri that twice that number will be removed from the flocks this year

GO OVERLAND TO FAIR.

Two Grant City Boys Start for Pacific Coast in Buggy.

Walter S. Bond and Fred Shipley of Grant City left this week for the Panama-Pacific fair at San Francisco, each in a buggy drawn by one horse. They will take considerable time enroute to sight seeing, and expect to earn part of their way across the western half of the continent.

Both of these young men were born and reared in Worth county. Fred Shipley is a son of Mrs. Susan Shipley of Grant City and attended the Grant City high school. Walter Bond, a son of Mr. and Mrs. W. R. Bond of Grant City, was also graduated from the Grant City high school in 1906 and from Westminster college at Fulton in 1910.

Improve at Parnell Depot.

The station platform at Parnell is being improved this week by the Chicago Great Western. New timbers have been placed close to the track and cinders filled in, making the platform about six inches higher. The company recently built a new water tank there.

Racing Horse Brings $3,500.

"Julia L," one of the best racing horses of B. A. Jones of Parnell, has been sold at Lexington, Ky., for $3,500 with a guarantee of 25 per cent of her winnings. Mr. Jones recently took two of his best steeds to the Kentucky fair, after returning from Mexico.

A Good Excuse.

One day last week, while a North Main street man was busy cleaning up his back yard, a hungry hobo called and asked for food. He was promised a good dinner if he would assist in cleaning up the yard. Being hungry, the hobo agreed, and was put to work carting soil in a wheelbarrow.

Willie disposed of several loads while the owner stood watching.

"Say," remarked the man, "Do you always juggle a wheelbarrow that way?"

"Sure," answered the hobo; "what's the matter with my performance?"

"Nothing," returned the man, "only you ought to push a wheelbarrow, not pull it."

"I know," admitted the tramp mournfully," but I can't bear the sight of the cussed thing."

Circle to Meet.

The Queen Esther Circle will meet Saturday afternoon at the home of Miss Mary Sewell, 1003 North Main street.

To Entertain P. E. O. Chapter.

Mrs. Wellington Dusenberry will entertain the P. E. O. chapter at her home, on West Fourth street, at 2:30 o'clock tomorrow afternoon.

Wade Harlan Ross.

Mr. and Mrs. Wade Ross of Quitman announce the birth of their son yesterday morning. The child has been named Wade Harlan.

Literary Societies Picnic.

The Philomathean and Eurekan Literary societies of the State Normal enjoyed an indoor picnic supper last night in the Normal building. About seventy-five students participated.

Society to Meet.

The Young Women's Missionary society of the First Methodist church will meet at 2:30 o'clock Saturday afternoon at the home of Miss Kate Willis, 107 North avenue.

The Misses Remus to Entertain.

Misses Margaret, Frances and Kathryn Remus will be hostesses Saturday afternoon to the King's Herald band of the First Methodist church, which will meet at the Remus home, 620 West First street.

Dinner Party.

Mr. and Mrs. B. E. Pfeiffer of Pickering entertained with a dinner Wednesday, complimentary to Mrs. Pfeiffer's aunt, Mrs. James Chambers of Loveland, Col. The guests were Mrs. Chambers, Mrs. Charles Cockayne and son of Maryville, and Mrs. Mary Chambers of Hopkins.

Family Reunion.

Mrs. C. E. Gregory will leave tomorrow for Mt. Ayr, Ia., where she will attend a reunion of the Larmer family, which will be held at the home of Mrs. Gregory's sister, Mrs. A. M. Soules. The gathering is held in honor of an uncle, Alexander Larmer, who is making his first visit in forty-six years with the members of the family living in Iowa and Missouri.

Pueblo Visitors Here.

Mrs. Francis Totterdale and her sister, Mrs. S. J. Richardson, and Mrs. Totterdale's daughter, Mrs. Joseph Lou McKee, and small son, Joe, arrived in the city at noon today to visit at the home of Mrs. Isabelle Worst, a sister of Mrs. Totterdale, and Mrs. Richardson and other relatives in the city. The visitors are former residents of Maryville, leaving here a few years ago to make their home in Colorado. They expect to remain several weeks.

K. of C. Social.

The Knights of Columbus will hold their first social evening since the closing of the Lenten season tonight at 8 o'clock, in their rooms in Ryan hall, on North Buchanan street.

Lodges Enjoy Social Evening.

The Royal Neighbors and Modern Woodmen lodges held a social evening last night at their hall, on Main and Third streets. Piano numbers were given by Miss Hilda Lahr and vocal numbers by George Roberts and Byron Oliver. Various games were enjoyed and a supper served.

Holds Final Meeting.

The final meeting before the summer's adjournment was held by the Modern Drama department of the Twentieth Century club last night in the tea room of the Elks club. The study period was devoted to "Sweet Lavender," by Pinero, and the book review was given by Mrs. Walter Hanson. At a business meeting, which was held for the adjustment of the year's work, department officers were elected for next year. Those chosen were Miss Beatrix Winn, chairman, who was re-elected; Miss Mildred Miller, vice chairman, and Miss Kate Schenck, secretary-treasurer. A decision was also given for the money on hands to be used in the purchase of books for the coming year's study. Mrs. Berney Harris was a visitor at the meeting.

The Lowly Corn Cob Pipe.

There is virtue in a corn-cob pipe. Many women will deny this. Some, who have endured this herculean odor for the sake of the quieting effect it seemed to exert over a husband who is given to occasional manifestations of ill temper, will declare that while it may be virtuous at times, it is never more virtuous than whe reposing in an airtight fruit jar on the cellar stairs.

Nevertheless, the corn-cob pipe is not a thing to be sneered at. It is a democratic institution. One evidence of the fact that this country is not so democratic as foreigners believe, is that according to the code of an American gentleman, the corn-cob pipe must not be smoked while wearing a silk hat. But some men find difficulty in adapting themselves to the "Missouri meerschaum."

They contend that the first puff from a new cob pipe is like a breath from the nether regions. This aversion arises from the circumstances that, like a sponge, a new cob pipe should be dipped in water before it is used. After the first pipeful of tobacco has been smoked, it will be found that a liberal coat of ashes has attached itself to the walls of the pipe, rendering it thereafter much less likely to burn the tongue than if it were initiated without the formality of baptism.

There is one place, however, where the corn cob pipe is distinctly dangerous, and that is in the mouth of a beginner in the mellow art of smoking. Mothers who dread the day when their sons shall feel obliged to assert their entrance into man's estate by acquiring a taste for tobacco, will do well to buy a corn-cob pipe and leave it carelessly about the house. In time it will be missed. So will the boy's appetite. But the appetite will come back.—Indianapolis News.

A Talk to Mothers About Croup and Cold Troubles

The New Treatment With Fresh Air and Antiseptic Vapors That Does Away With Injurious Internal Medicines, Flannel Jackets, etc., etc.

All mothers are "home doctors" when it comes to treating the croup and cold troubles that all children are heir to. They know that growing children need outdoor exercise, and that, with outdoor exercise, some colds are bound to come. They know, too, that internal medicines injure delicate little stomachs, but that these colds must have some kind of treatment.

The answer to this problem is the "external" treatment, Vick's "Vap-O-Rub" Salve. For the many forms of cold troubles, from head colds, asthma and catarrh, down to sore throat, bronchitis and deep chest colds Vick's will be found better than internal medicines. Just apply Vick's well over the throat and chest, covering with a warm flannel cloth. Leave the covering loose around the neck so the vapors, released by the body heat, may be freely inhaled. The next morning the head is clear, phlegm loosed, and soreness gone.

No one realizes the value of an external treatment better than the skilled druggist, and while the profit is not as large on Vick's "Vap-O-Rub" as on internal preparations, the druggists listed below are anxious that their customers should know of this new treatment. They are, therefore, offering Vick's in the three sizes—25c, 50c or $1.00, on 30 days' trial. With each sale is given a refund blank—good for your money back if not delighted.

PICK BARNARD SCHOOL FACULTY

Miss Bessie Cox, Assistant Principal in High School—Other Members.

Miss Bessie Cox, teacher in the Graham public schools, the past term, was elected assistant principal of the Barnard high school, last night by the school board. She is a daughter of Mr. and Mrs. John Cox of Maryville. She succeeds Miss May Ives.

The other members of the Barnard school facutly were selected several days ago. They are: J W. Pierce, of Blythesdale, principal, to succeed D. D. Hooper, who becomes principal of the Bolckow school; L. Mendenhall retained in grammar or sixth, seventh and eighth grades; Miss May Nelson, retained in intermediate grades; Miss Mayme Armstrong, retained in primary grades

IS ON TEXTBOOK COMMISSION

Dean G. H. Colbert, Appointed on the County Body—Also Recommend W. M. Westbrook.

Dean G. H. Colbert of the Norami faculty was appointed on the Nodaway County Textbook Commission, late yesterday afternoon by the county court to succeed C. A. Hawkins of the Normal faculty. Another member will be appionted soon by the state department of education. Prof. W. M. Westbrook, superintendent of the city schools, has been recommended. The chairman is Bert Cooper, county school superintendent.

The purpose of the commission is to select text books for the public grade and high schools of the county. There will be few if any changes to be made prior to the 1915-16 term, however.

175 Enter St, Joe Meet.

Five schools, with 175 entries, are to participate in the annual Missouri valley inter-scholastic track meet at Lake Contrary, near St. Joseph, tomorrow. They come from the three states of Missouri, Kansas and Nebraska.

Hold Annual Party.

The annual party given by the juniors of the State Normal school to the seniors of the school will be held at the Normal today.

FEW ALIENS INTO STATE.

Influx Into Missouri Decreases 76 Per Cent Since War—Fewer Leave.

The effect the European war had on foreign immigration into Missouri during the first eight months of its progress, is dealt with in a bulletin of the bureau of labor statistics, for publication by Commissioner John T. Fitzpatrick. There was a falling off in the number of aliens who entered of 76 per cent when comparisons are made with the monthly average of the fiscal year which closed June 30, 1914.

"During the fiscal year which closed June 30, 1914, the twelve months preceding the war, 13,781 men, women and children from foreign countries entered United States harbors with Missouri as their direct destination, or a monthly alien influx average of 1,148. For the eight months commencing with the war and when the fiscal year just given closed, and ending February 28, 1915, only 2, 183 aliens arrived bound for this state, or an average of 278 a month. February, 1915, held the worst record of the eight months, only 84 coming into Missouri in those twenty-eight days.

During the fiscal year ending June 30, 1914, 2,744 emigrant aliens left Missouri for their former homes in other countries, or an average of 228 a month. For the period since the war commenced the Missouri average of those returning home was 155 a month or 73 less than the departures before the war.

The love of the French for the place of their birth seems to be stronger than that of the other nationalities involved in the conflict, the number of those departing since July 1, last, having increased 267 per cent. For former subjects of Great Britain the departures after the war decreased 8 per cent.

German born subjects make even a worse showing, but this is chiefly due to the fact that traffic with Germany ceased with the first battle and that the blockade the allies have established around that country is so effective patriotic Teutons cannot slip through, the number of those returning since the war having decreased 67 per cent. The Austrian and Servian showing is about the same.

To Play Bedford Sunday.

The Hopkins base ball team, which defeated the Maryville All Stars last Sunday by a score of 13 to 10, will play the Bedford, Ia., team at Athletic park, Hopkins, next Sunday.

HOW TO KEEP MOTHS AWAY.

Repellants Do No Good Unless Eggs Are Brushed from Clothes.

The various substances used to keep away moths, such as tobacco, camphor, naphthalene cones or balls, tarred paper and cerad chips have no effect if the eggs are already present in the clothes, and entomology specialists in the United States department of agriculture therefore recommend a thorough beating, shaking and brushing of all articles likely to attract moths, before they are laid away for the summer.

The brushing of garments is especially important in order to remove eggs which may have escaped notice. If the articles are quite free from eggs or larvae when laid away, the odor from the various repellants already mentioned or from cedar chests and wardrobes will serve to keep the moths away. This odor, however, lessens with age, so that the protection it affords is greatly decreased after a few years. For this reason when furs and other valuable garments are wrapped in tarred paper or placed in sacks of tarred paper these containers should be renewed every year or two.

In general moths are likely to affect only articles which are put away and left undisturbed for some little time. Apartments and closets that are frequently aired and swept are not apt to be seriously affected. In fact, airing and sunlight are probably the best as well as the oldest remedies.

Where circumstances demand that the articles be put away, however, a convenient and effective device is to place them in large pasteboard boxes such as tailors use and gum a strip of wrapping paper around the edgs to as to seal up the box completely and leave no cracks.

If the garments have been thoroughly cleaned before being placed in these boxes, no additional protection is necessary and there is none of the objectionable odor which is characteristic of so many moth repellants.

"Quality Talks"

Expert Advice For the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

When adding electrolyte to a storage battery, should it be done when the battery is discharged, and, if so, how can one tell when the proper amount has been added?

Distilled water should be added before the battery is placed on charge. The solution should cover the plates. In some batteries the level is one-half inch higher than the tops of the plates. A battery can be tested at any time, and obviously the only way to tell whether it is fully charged or not is to test it in some manner, the gravity method usually being used.

What part does glycerin play in an anti-freeze solution?

Glycerin is used in anti-freeze solutions for the reason that it prevents the alcohol in such solutions from evaporating rapidly and thus preserves the power of the mixture to resist the cold.

I would like to have you tell me why I have trouble in starting my car when warm. Several times I have had to get help from some one who could spin it. Spinning always starts it, but this I am unable to do. It always starts readily if thrown into high when rolling down a grade.

The fact that you have no trouble in starting the motor when cold would indicate immediately that the trouble is not in the ignition system. If you will try a slightly richer mixture on the carbureter it may relieve the trouble. Another possible cause is that the valves may be adjusted too close so that when cold they close, but when warm there is an air leak that dilutes the mixture. Carbon trouble also acts this way at times, and if the motor has not been cleaned out lately it is suggested that the carbon be removed. Another possible feature which does come under the head of ignition is that the dry batteries may be weak.

In drilling holes in pistons to make them lighter how much can be taken off and how should they be drilled?

You can safely drill eight three-eighths inch holes equally spaced around the piston. In drilling place a cylindrical block of wood in the piston, the wood just fitting. This will prevent the metal from cracking. You can hold the piston under the drill with your hands.

Would a good iron rivet be suitable to rivet a front cross member to the frame on a light car or should it be put on with steel rivets?

Good iron rivets would be suitable to use on the frame of a light car. The principal stress endured by these rivets is one of sheer through the tendency to rack on the part of the frame. A great deal depends upon the manner in which the riveting is done. For instance, it has been shown in experimenting that a rivet is 6.5 per cent weaker in a drilled hole than in a punched hole and that by rounding the edge of the rivet hole the apparent sheering resistance is increased 12 per cent. It is also true that sheering resistance is probably less for double than for single sheer, and this is probably due to the unequal distribution of the stress on the two rivet sections. Experiments on the sheering strength of iron and steel rivets would indicate that the proportion of iron to steel is as 19 to 22.1. This ratio is said to be valid only if the sheer is in a plane perpendicular to the direction of rolling, which would be approximately the case in your cross frame connection.

What are the advantages and disadvantages of the disk friction chain drive compared with other types of transmission now more commonly used?

The advantages of the friction transmission are that it offers an infinite number of gear ratios, is silent, cheap to manufacture and simple. The disadvantage is that the friction disk must be renewed every few thousand miles. This is a small matter, but worth noting, and the amount of horsepower it will transmit under the conditions found in automobile design is limited. Therefore it has never been used to any extent on large cars, but has found favor on some cars of medium size and on more small cars.

The gear set of my car is of the planetary type. When the low speed pedal is pushed down to start there is a knock heard from the gear set at regular intervals. What is the cause of it?

Owing to the speed of the motor in starting out on low speed the knock you speak of possibly is at the outer bearing or transmission shaft bearing, where the car is cranked. The dust and dirt continually working in this babbitt cut out the bearing sufficiently to produce a knock at this point. This bearing has a babbitt lining and must be poured to fit the shaft.

Please explain whether there would be any advantage gained by fitting aluminium pistons?

Aluminium pistons are lighter and reduce the vibration because of their light weight. The expansion of aluminium under heat is greater than that of cast iron, giving great difficulty in determining clearance.

Will slightly rotating the poppet valves of a motor prevent the valves from improperly seating and carbon from forming on the valve seats?

Oscillating the valves will tend to keep the seats clean and thus the valves will be found to seat more uniformly. Naturally, this will also prevent the accumulation of carbon in any quantity on the seats.

My motor skips when running slowly or pulling hard on high gear if the spark lever is advanced more than half way on the quadrant. As soon as I retard the spark below this point the engine picks up and will pull as well as it ever did. Why is this? It is not the fault of the carbureter, as I have tried all kinds of adjustments and have operated it under every condition.

If the magneto is correctly timed it is probable that the trouble is due to weak magnets. When the spark lever is advanced all the way the spark actually occurs when the armature is at the edge of the magnetic field instead of being in the position where the strength of the field is greatest. Therefore if the magnets are weak the effect must first be felt at the weakest point in the field, and that may be either a position of great advance or retard, depending on how the magneto is linked up. Recharging the magnets should remove the trouble.

I have a bent steering knuckle. Should this be straightened when cold or hot?

The knuckle should be straightened when hot. It is better to put in a new one, however, as it is difficult to straighten it so that the wheels will run true. If the bend is in the spindle there is no possibility of straightening it satisfactorily, and even if only the arm is bent it will be hard to true it up.

Are the so called anti-rust preparations injurious to the cooling system?

We have no reports where any of the preparations which are on the market that are sold especially for automobile radiators have done any harm. There are occasions, however, where boiler compounds have been used which contain corrosive substances that have acted injuriously on the radiator and water connections. For this reason before using any preparation it should be known that it is intended particularly for radiators and nothing else.

How far apart should the spark plug points be, using a high tension magneto?

The usual point clearance is one thirty-second inch, but many find that even a smaller clearance is better. If the plug points are too far apart you will soon be aware that something is wrong, as the motor will start to miss, particularly when the car is running slowly.

We would appreciate your telling us how to correct the oiling system in a new car which has given trouble since it left the factory. The car has been driven 3,000 miles, so by this time should be thoroughly "worn in." The trouble is that oil works up into the first and fourth cylinders.

Faulty piston rings seem to be the only condition which would give the oiling trouble you mention. It may be that the joints of the rings, which are of the ordinary eccentric type, have become aligned, leaving a passageway for the oil to enter the combustion space. Another possibility is that you have too much oil in the crank case, which causes a greater supply than necessary to be thrown up. It would seem that the best step to take would be to remove the pistons and examine the rings on the cylinders that give the trouble. The pistons can be removed by taking off the lower half of the crank case, removing the lower connecting rod bearing cap and withdrawing piston and connecting rod assembly. A replacement of the rings should eliminate the difficulty.

Can gas such as generated from carbide be used in an automobile engine?

Yes. Occasionally we hear of a motorist driving home on acetylene gas when his supply of gasoline is exhausted. The objection to the use of this gas is that it is much more expensive than gasoline.

The storage battery seems to charge on my car so that it will furnish current for the lights and start the motor; then suddenly it will become discharged. Where should I look for the trouble?

From the information you furnish it would seem that the battery is either completely discharged or you have a short circuit in the system. It would seem quite likely that it is the former, and if this is the case a thorough recharge will remedy the difficulty unless the battery has been left in the discharged condition for too great a length of time. If so, the battery will probably require overhauling. The symptom for this trouble is exactly what you describe—the battery starts the motor and also gives a very bright light for a few moments and then apparently is dead.

IT IS SPRING FEVER TIME.

Is Not Disease, But Condition—Change of Diet and Clothing.

It is the "spring fever" season—the time when a fellow feels like doing nothing with all his might—the time when we account for our antipathy to work with the statement that "it's spring fever." There is really no such disease as spring fever, but there is such a condition.

It is due to the fact that warm weather comes before the body is prepared for it. We have gone through a season's cold. The blood has become thickened from the heavy foods that have been eaten. Nature put us in proper shape for enduring the cold, but we are plunged into the heat before we have had time to fit the blood and nerves and muscles for the higher temperature; in many instances, in fact, before we have even changed the clothing to the requirements of the warmer days.

So we find ourselves easily "tired out," at this season of the year. We have trouble in "getting up stream." There is an inclination to sit down and rest—and we yawn and "strench," and feel uncomfortable, and talk about "spring fever."

The remedy for the languor that comes with the spring-time is a change of diet, as well as a change of clothing. Fruits and vegetables will do the business. Nature sends the products of the soil as they are consumed early. Rhubarb, lettuce, asparagus, "greens"—these are the things which come early and which are the correct remedy for "spring fever." Then there is the old-fashioned remedy for "thinning the blood"—sassafras tea.

Nothing better has ever been compounded or invented or grown from the ground. It will do the business. The old-time folks had some homely remedies, and some homely philosophy. Sassafras tea is a remedy, and its use in the spring-time is philosophical.

SUFFERED 15 YEARS, CURED IN 21 DAYS

Astounding Cures Made by This Remarkable New Discovery.

Gentlemen: For over fifteen years I was afflicted with eczema, covering my arms, legs and face. I suffered so much distress that I could not sleep. My face was red and swollen, and covered with dry, feverish scales. I was unable to attend to business for weeks at a time.

I had about given up all hope when I tried your remedy, Amolox. The first application gave me relief so I could sleep. After applying it for several days I was able to attend to business. After thirty days' treatment my eczema entirely disappeared.—James R. Rigby, Youngstown, O.

Amolox is the prescription of a physician who used it with wonderful success in his private practice. Now, for the first time, offered for sale by the leading druggists.

Amolox Ointment will quickly banish pimples on the face, blackheads, and all minor skin troubles. Chronic cases of Psoriasis, Salt Rheum, Tetter, that have suffered for years, require both the Ointment and Solution to effect a cure. Trial size, 50c. Guaranteed and recommended by the Orear-Henry Drug Co.

Jefferson Broyles.

Jefferson Broyles was born in Tennessee, September 8, 1835; died May 4, 1915. He lived in Atchison and Nodaway counties since he was 8 years old. He has lived on a small farm west of Maryville for the past forty-five years. He was married to Angeline Shields, March 5, 1855, who survives him. Ten children were born to this union, four of whom live and were at the funeral.

They are Asa J. Broyles of Broken Bow, Neb.; Mrs. C. E. Closser of Kansas City, Mrs. D. T. Dalrymple and Mrs. Nick Thull of Pickering. He had one brother, Solomon Broyles, who was chief of police in St. Joseph for twenty years, he has one living brother, Asa Broyles, west of Maryville, who is 82 years old.

His father, Richard Broyles, was one of the early settlers of the Platte purchase, and died a few years ago at the age of 94. He has one half-brother, Richard Broyles of Clearmont, and two half-sisters, Mrs. Mary Ferguson of Burlington Junction and Anna Broyles. Mr. and Mrs. Broyles have been in very poor health for several years and lived on their little farm alone. Their wants were looked after by Mr. and Mrs. William Job, who lived near them.

It became necessary a short time ago to take Mr. Broyles to State hospital No. 2 at St. Joseph, and their home was broken up. When he died, Mr. and Mrs. Job had them bring the body to their home, where the funeral was held Wednesday afternoon, conducted by the Rev. Burger of Quitman.

Your "Traveling Home" to California Expositions

Going to California even the most direct way requires days—not hours—long enough for you to experience either restful home-like **satisfaction,** or restless **discomfort**—irritation. Make a careful choice of routes—based on **Service.**

Service is the big individual feature of the Burlington—and travel-wise people know it. The roadbed is smooth, the maximum of safety insured, train equipment the last word in luxury. Berths are like "home beds." The meals are tasty and varied—reasonable in price—and well served. Burlington trains have all the little added features that distinguish modern "limited" travel. And best of all, Burlington employees are as courteous as they are efficient. They help speed the days—point out and intelligently explain the wonderful country you traverse.

Because of the liberal provisions of the Burlington's Grand Circle Tour, you can stop over at any point. But, if you go straight through, you arrive refreshed—becauses of pleasant days and comfortable nights.

This is the tour de luxe—the Burlington's Grand Circle—through glorious Colorado; Denver, the new Rocky Mountain National (Estes) Park, Colorado Springs, Pikes Peak Region, Royal Gorge **by daylight;** daylight view of Salt Lake City and Great Salt Lake. Then, Los Angeles, San Diego exposition, and the Panama-Pacific. An ocean trip by steamer to Portland; the great Pacific Northwest. And homeward bound, via Glacier National Park or Yellowstone Park.

Come in and get your copy of our California Expositions folder.
